Channels of Propaganda
J. Michael Sproule 1994
Defining propaganda as "efforts by special interests to win over the public covertly by infiltrating messages into various channels of public expression ordinarily viewed as politically neutral," this book argues that propaganda has become pervasive in American life. Pointing out that the 1990s society is inundated with propaganda from numerous sources (including government, business, researchers, religious groups, the news media, educators, and the entertainment industry) the book exposes these channels of propaganda and the cumulative effect they have on public opinion and the functioning of American democracy. Chapter 1 reviews materials on diverse vantage points from which American writers and opinion leaders have tried to reconcile mass persuasion with the democratic way of life during the 20th century. Chapters 2-6 examine propaganda in: (1) government (e.g., Federal Bureau of Investigation, aid to the Contras, Star Wars, presidential styles); (2) research and religion (e.g., national security, private sector, religion and politics); (3) news (e.g., getting good coverage, pressure groups, and business); (4) classroom (e.g., business propaganda, pressure groups, textbooks, pressures on teachers); and (5) entertainment (e.g., film, television). Chapters 7 and 8 question: (1) what action a democratic people should take to safeguard intelligent discussion and free choice from the taint of devious communication; (2) to what extent propaganda casts a shadow over public life; and (3) whether large-scale, engineered persuasion can ever be squared with the ideal of democratic public deliberation. Extensive chapter notes and an index are included. (NKA)

Culture and Rhetoric
Ivo Strecker 2009-07-30
While some scholars have said that there is no such thing as culture and have urged to abandon the concept altogether, the contributors to this volume overcome this impasse by understanding cultures and their representations for what they ultimately are—rhetorical constructs. These senior, international scholars explore the complex relationships between culture and rhetoric arguing that just as rhetoric is founded in culture, culture is founded in rhetoric. This intersection constitutes the central theme of the first part of the book, while the second is dedicated to the study of figuration as a common ground of rhetoric and anthropology. The book offers a compelling range of theoretical reflections, historical vistas, and empirical investigations, which aim to show how people talk themselves and others into particular modalities of thought and action, and how rhetoric and culture, in this way, are co-emergent. It thus turns a new page in the history of academic discourse by bringing two
disciplines — anthropology and rhetoric — together in a way that has never been done before.

The Enthymeme James Fredal 2020-03-12 Central to rhetorical theory, the enthymeme is most often defined
as a truncated syllogism. Suppressing a premise that the audience already knows, this rhetorical device relies on the audience to fill in the missing information, thereby making the argument more persuasive. James Fredal argues that this view of the enthymeme is wrong. Presenting a new exegesis of Aristotle and classic texts of Attic oratory, Fredal shows that the standard reading of Aristotle’s enthymeme is inaccurate—and that Aristotle himself distorts what enthymemes are and how they work. From close analysis of the Rhetoric, Topics, and Analytics, Fredal finds that Aristotle’s enthymeme is, in fact, not syllogistic and is different from the enthymeme as it was used by Attic orators such as Lysias and Isaeus. Fredal argues that the enthymeme, as it was originally understood and used, is a technique of storytelling, primarily forensic storytelling, aimed at eliciting from the audience an inference about a narrative. According to Fredal, narrative rather than formal logic is the seedbed of the enthymeme and of rhetoric more broadly. The Enthymeme reassesses a fundamental doctrine of rhetorical instruction, clarifies the viewpoints of the tradition, and presents a new form of rhetoric for further study and use. This groundbreaking book will be welcomed by scholars and students of classical rhetoric, the history of rhetoric, and rhetorical theory as well as communications studies, classical studies, and classical philosophy.

Fundamentals of Argumentation Theory
Frans H. van Eemeren
2013-11-05
Argumentation theory is a distinctly multidisciplinary field of inquiry. It draws its data, assumptions, and methods from disciplines as disparate as formal logic and discourse analysis, linguistics and forensic science, philosophy and psychology, political science and education, sociology and law, and rhetoric and artificial intelligence. This presents the growing group of interested scholars and students with a problem of access, since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix. This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation. It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research. Argument has been the subject of systematic inquiry for twenty-five hundred years. It has been graced with theories, such as formal logic or the legal theory of evidence, that have acquired a more or less settled provenance with regard to specific issues. But there has been nothing to date that qualifies as a unified general theory of argumentation, in all its richness and complexity. This being so, the argumentation theorist must have access to materials and methods that lie beyond his or her "home" subject. It is precisely on this account that this volume is offered to all the constituent research communities and their students. Apart from the historical sections, each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program. Because the chapters are self-contained, they can be consulted in the order of a reader’s interests or research requirements. But there is value in reading the work in its entirety. Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments, this book is an impressively authoritative
contribution to the field.

**A Rhetoric of Doing** James L. Kinneavy 1992

Concerned with both the nature and the practice of discourse, the eighteen essays collected here treat rhetoric as a dynamic enterprise of inquiry, exploration, and application, and in doing so reflect James L. Kinneavy’s firm belief in the vital relationship between theory and practice, his commitment to a spirit of accommodation and assimilation that promotes the development of ever more powerful theories and ever more useful practices. A thorough introduction provides the reader with clear summaries of the essays by leading-edge theorists, researchers, and teachers of writing and rhetoric. A "field context" for the ideas presented in this book is provided through the division of the various chapters into four major sections that focus on classical rhetoric and rhetorical theory in historical contexts; on dimensions of discourse theory, aspects of discourse communities, and the sorts of knowledge people access and use in producing written texts; on writing in school-related contexts; and on several dimensions of nonacademic writing. A fifth section contains a bibliographic survey and an appreciation of James Kinneavy’s work. The exceptional range of these essays makes A Rhetoric of Doing an ecumenical examination of the current state of mind in rhetoric and written communication, a survey and description of what discourse and those in the field of discourse are, in fact, doing.

**Rhetorical Aspects of Discourses in Present-Day Society** Lotte Dam 2009-05-27

Since antiquity, the notion of
rhetoric has been associated with Aristotle, Cicero and Quintilian. Their theories are central to the understanding that, on the one hand, rhetoric can be used for persuading and convincing an audience, and on the other, for becoming an eloquent speaker. Based on this understanding, the study of rhetoric was for many years regarded by scholars as a meaningless enterprise as it was perceived as a study of linguistic ornamentation. However, in the beginning of the twentieth century, scholars regained an interest in the study of rhetoric in recognition of rhetorical skills being important for communication in modern society. Like speakers in public life, e.g. politicians, who had always acknowledged the role of rhetoric, all sorts of communicators, mediators and scholars became interested in rhetoric as a practical tool for building up texts meant for the public sphere as well as an analytical tool for the critique of public argumentation. This led to the development of new theories from New Rhetoric over Rhetorical Criticism to theories of genre and discourse, reflecting the view that rhetoric must be understood and used against the social and cultural framework in which it is embedded. The contributions of this book reflect this multi-faceted approach to rhetoric, discourse and genre through their focus upon and analysis of different institutionalised discourses. Thus, within the three sections of political, journalistic and organisational discourse, the articles discuss various discourse types and their rhetorical features, contributing to the understanding of rhetoric and discourse having significant influence on human action and interaction in society.

**Landmark Essays on Aristotelian Rhetoric** Richard Leo Enos 2020-11-26 There is little doubt that Aristotle’s Rhetoric has made a major impact on rhetoric and composition studies. This impact has not only been chronicled throughout the history of rhetoric, but has more recently been contested as contemporary rhetoricians reexamine Aristotelian rhetoric and its potential for facilitating contemporary oral and written expression. This volume contains the full text of Father William Grimaldi's monograph studies in the philosophy of Aristotle’s Rhetoric. The eight essays presented here are divided into three rubrics: history and philosophical orientation, theoretical perspectives, and historical impact. This collection provides teachers and students with major works on Aristotelian rhetoric that are difficult to acquire and offers readers an opportunity to become active participants in today's deliberations about the merits of Aristotelian rhetoric for contemporary teaching and research.
