History Lesson for Girls Aurelie Sheehan 2006-07-06 in her follow-up to the critically acclaimed novel The Anxiety of Everyday Objects, Aurelie Sheehan presents a moving coming-of-age story set in the disturbingly reckless and often hilariously tacky 1970s. In 1975, Alison Glass, age thirteen, moves to Connecticut with her bohemian parents and her horse, Jazz. Shy, observant, and in a back brace for scoliosis, Alison finds strength in an unlikely friendship with Kate Hamilton, the charismatic but troubled daughter of an eccentric New Age guru and his substance-loving wife. Seeking refuge from the chaos in their lives, the girls escape into the world of their horses. Rich in humor and heartbreak, History Lesson for Girls is an elegy to a friendship that meant everything.

Village of the Dammed James Lomuscio 2005 Village of the Dammed is the story of the proud Yankee residents' resistance in the late 1930s to the proposed flooding and its life-altering repercussions."-- Jacket.
Any Woman's Blues Erica Jong 2006-12-28 Any Woman's Blues, first published in 1990, is a tale of addiction and narcissism--the twin obsessions of our age. World-famous folk singer Leila Sand emerged from the sixties and seventies with addictions to drugs and booze. Leila's latest addiction is to a younger man who leaves her sexually ecstatic but emotionally bereft. The orgasmic frenzies trump the betrayals, so she keeps coming back for more. Eventually, Leila frees herself by learning the rules of love, the Twelve Steps, and the Key to Serenity in an odyssey that takes her from AA meetings to dens of sin, parties with "names" worth dropping, and erotic gondola rides.

Weston Kathleen Saluk Failla 2003 The lives of Weston's settlers from the late seventeenth century on are linked with those of Native Americans who trod the rugged wilderness before them. Today, the memory of the settlers and native people lives on in the special character of this independent town that was once part of Fairfield. Weston has long attracted a diverse group-celebrated actors, artists, authors, business executives, and media professionals who have blended easily with farmers and craftsmen. All of them share an appreciation for the natural beauty of Weston's bogs, streams, and hilly woodlands. Through pictures, Weston tells the history of the town and the people who have loved it.

A Professor, A President, and A Meteor Cathryn J. Prince 2010-12-14 When a fiery meteor crash in 1807 lit up the dark early-morning sky in Weston, Connecticut, it did more than startle the few farmers in the sleepy village. More importantly, it sparked the curiosity of Benjamin Silliman, a young chemistry professor at nearby Yale College. His rigorous investigation of the incident started a chain of events that eventually brought the once-low standing of American science to sudden international prominence. And, by coincidence, the event also embroiled Silliman in politics, pitting him against no less an adversary than President Thomas Jefferson. Based on a wealth of original source documents and interviews with current experts in history, astronomy, and geology, this journalist tells the remarkable story of Benjamin Silliman, arguably America's first bonafide scientist. In a lively narrative rich with fascinating historical detail, the author documents the primitive state of American science at the time, Silliman's careful analysis of the meteor samples; and the publication of his conclusions, which contradicted both popular superstitions regarding meteors as ominous portents and a common belief that meteors come from volcanic eruptions on the moon. She also describes Silliman's struggles to build a chemistry department at Yale with rudimentary material; new insights into geology that resulted from his analysis of the meteor; and his report to the prestigious French Academy, which raised the prestige of American science. Finally, she discusses the political turbulence of the time, which Silliman could not escape, and how the meteor event was used to drive a wedge between New England and Jefferson. This is a fascinating vignette of Federal Period science when science on this continent was still in its infancy, but was just beginning to make its mark.
