Fertility Preservation and Restoration for Patients with Complex Medical Conditions Allison L. Goetsch
2017-03-07 This unique book is a comprehensive guide for healthcare providers who treat patients with
complex medical conditions but lack the resources to address fertility and sexuality concerns and help
patients navigate their fertility decision-making process. It presents up-to-date information concerning
fertility preservation and restoration for patients with hereditary cancer syndromes, disorders of sex
development, hematologic diseases, genetic disorders of gonadal dysfunction, immunologic diseases,
gynecologic diseases, endocrine disorders, and autoimmune and inflammatory diseases. Utilizing a practical,
user-friendly format, each chapter discusses the epidemiology, classification, risk factors and/or clinical
manifestations, and diagnosis and treatment modalities specific to each condition, as well as the effect of it
or its treatment on fertility and unique options that may exist. Complex medical conditions are inherently
difficult to manage, and reproductive interventions are often not part of the conversation. As such, Fertility
Preservation and Restoration for Patients with Complex Medical Conditions will be an excellent resource for
primary care physicians, obstetrician/gynecologists, endocrinologists, oncologists, and other health
professionals working with patients with fertility concerns. This book, together with Oncofertility: Fertility
Preservation for Cancer Survivors; Oncofertility: Ethical, Legal, Social, and Medical Perspectives; Oncofertility
Medical Practice: Clinical Issues and Implementation; Oncofertility Communication: Sharing Information and
Building Relationships across Disciplines; and Pediatric and Adolescent Oncofertility: Best Practices and
Emerging Technologies, provides scientific and medically relevant information on fertility preservation from
all vantage points and is an indispensable series for those interested in fertility management in cancer or
complex settings.
