Essential Readings in Economics Saul Estrin 1995-01-01 Intellectual advances in economics often come from debates that have been partly forgotten but which offer context, depth, commitment and clarity to contemporary study. ESSENTIAL READINGS IN ECONOMICS makes available in a single volume some of the seminal papers...
in the area of microeconomics and macroeconomics for introductory and intermediate courses in economic principles, and has an Introduction by Saul Estrin and Alan Marin. Foundations of Insurance Economics Georges Dionne 2013-11-11 Economic and financial research on insurance markets has undergone dramatic growth since its infancy in the early 1960s. Our main objective in compiling this volume was to achieve a wider dissemination of key papers in this literature. Their significance is highlighted in the introduction, which surveys major areas in insurance economics. While it was not possible to provide comprehensive coverage of insurance economics in this book, these readings provide an essential foundation to those who desire to conduct research and teach in the field. In particular, we hope that this compilation and our introduction will be useful to graduate students and to researchers in economics, finance, and insurance. Our criteria for selecting articles included significance, representativeness, pedagogical value, and our desire to include theoretical and empirical work. While the focus of the applied papers is on property-liability insurance, they illustrate issues, concepts, and methods that are applicable in many areas of insurance. The S. S. Huebner Foundation for Insurance Education at the University of Pennsylvania's Wharton School made this book possible by financing publication costs. We are grateful for this assistance and to J. David Cummins, Executive Director of the Foundation, for his efforts and helpful advice on the contents. We also wish to thank all of the authors and editors who provided permission to reprint articles and our respective institutions for technical and
financial support.

Readings in Macroeconomics, Edited by M.G. Mueller Max Gerhard Mueller (1925-Ed) 1966

Imperfect Competition and Sticky Prices N. Gregory Mankiw 1991 These two volumes bring together a set of important essays that represent a "newKeynesian" perspective in economics today. This recent work shows how the Keynesian approach to economic fluctuations can be supported by rigorous microeconomic models of economic behavior. The essays are grouped in seven parts that cover costly price adjustment, staggering of wages and prices, imperfect competition, coordination failures, and the markets for labor, credit, and goods. An overall introduction, brief introductions to each of the parts, and a bibliography of additional papers in the field round out this valuable collection. Volume 1 focuses on how friction in pricesetting at the microeconomic level leads to nominal rigidity at the macroeconomic level, and on the macroeconomic consequences of imperfect competition, including aggregate demand externalities and multipliers. Volume 2 addresses recent research on non-Walrasian features of the labor, credit, and goods markets.

N. Gregory Mankiw is Professor of Economics at Harvard University. David Romer is Associate Professor of Economics at the University of California at Berkeley.

*A Macroeconomics Reader* brings together a collection of key readings in modern macroeconomics. Each article has been carefully chosen to provide the reader with accessible, non-technical, and reflective papers which critically assess important areas and current controversies within modern macroeconomics. The book is divided into six parts, each with a separate introduction highlighting the relevance of the ensuing articles. The areas covered include: Keynes's General Theory, Keynesian economics and the Keynesian revolution; monetarism; rational expectations and new classical macroeconomics; real business cycle...
approaches: New Keynesian economics: economic growth. This book will be an essential guide for students and lecturers in the field of macroeconomics as well as those interested in the history of economic thought. Readings in Macroeconomics 1984
