The White Darkness David Grann 2018-10-30 By the #1 New York Times bestselling author of *Killers of the Flower Moon*, a powerful true story of adventure and obsession in the Antarctic, lavishly illustrated with color photographs Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his journeys, but he repeatedly

rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton's men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton's legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton's crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk

across Antarctica alone. David Grann tells Worsley's remarkable story with the intensity and power that have led him to be called "simply the best narrative nonfiction writer working today." Illustrated with more than fifty stunning photographs from Worsley's and Shackleton's journeys, *The White Darkness* is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity.

The Heart of the Antarctic Sir Ernest Shackleton 2018-09-08

"MEN go out into the void spaces of the world for various reasons. Some are actuated simply by a love of adventure, some have the keen thirst for scientific knowledge, and others again are drawn away from the trodden paths by the "lure of little voices," the mysterious fascination of the unknown. I think that in my own case it was a combination of these factors that

determined me to try my fortune once again in the frozen south.... Indeed the stark polar lands grip the hearts of the men who have lived on them in a manner that can hardly be understood by the people who have never got outside the pale of civilisation. I was convinced, moreover, that an expedition on the lines I had in view could justify itself by the results of its scientific work. The Discovery expedition had brought back a great store of information, and had performed splendid service in several important branches of science. I believed that a second expedition could carry the work still further...." Sir Ernest Shackleton

The Heart of the Antarctic and South Sir Ernest Henry

Shackleton 2007 Ernest

Shackleton led two Antarctic expeditions, and died shortly after the beginning of the third. His expedition ship *Endurance* was trapped, then crushed in the

ice, before his party could be landed, leaving his men in a hopeless situation. For months Shackleton held his party together before taking to boats and bringing everyone to safety.

In Shackleton's Footsteps Henry Worsley 2011-11-22 On October 29, 1908, a party of four men, led by Ernest Shackleton, set out to be the first to reach the South Pole. Three months later, their mission was in ruins and they faced certain death if they carried on. Just ninety-seven miles from the South Pole, Shackleton turned back. One hundred years later, in October 2008, a team that included descendants of that original party, led by Henry Worsley, set out from Shackleton's hut to celebrate the centenary of his expedition by retracing the exact 870-mile route and going on to finish the last ninety-seven miles. This captivating book explores the history of the original expedition and reasons behind its failure,

while capturing the meticulous planning, fundraising, and training for the new expedition. It includes riveting accounts of the team's first days on the ice, Christmas on the polar plateau, the brutal reality of crossing the Beardmore Glacier, and the final miles to the South Pole. In *Shackleton's Footsteps* is a unique story of adventure, pioneering spirit, settling old family business, and man's triumph over nature.

The Heart of the Antarctic Sir Ernest Henry Shackleton 1909

In the Heart of the Antarctic Sir Ernest Shackleton 2000

Frustrated by his experiences on an expedition led by Captain Robert Scott, explorer Ernest Shackleton, in 1907, launched his own attempt to reach the South Pole. At the mercy of a hostile continent it was to become the most extreme test of endurance imaginable. This is his thrilling account of that expedition.

The Heart of the Antarctic Sir Ernest Henry Shackleton 1909

This is the second in a comprehensive two-volume series documenting the British Antarctic Expedition of 1907 to 1909. This volume begins with the summer at the Winter Quarters and ends with Professor David's narrative of the first journey to the magnetic South Pole. The volume also includes numerous stunning photographs of the expedition.

Ernest Shackleton Rebecca L. Johnson 2003-01-01 A biography of Sir Ernest Shackleton, the daring, charismatic Antarctic explorer who fell short of his goal of crossing Antarctica, but accomplished a far greater feat by bringing every member of his crew back alive.

The Heart of the Antarctic E H Shackleton 2014-08-07 This Is A New Release Of The Original 1909 Edition.

A Walk to the Pole Roger Mear 1987 A behind-the-scenes account of the modern expedition that followed Captain Robert Falcon

Scott's 1912 route across Antarctica to the South Pole.

The Heart of the Antarctic Sir Ernest Henry Shackleton 1909

This is the second in a comprehensive two-volume series documenting the British Antarctic Expedition of 1907 to 1909. This volume begins with the summer at the Winter Quarters and ends with Professor David's narrative of the first journey to the magnetic South Pole. The volume also includes numerous stunning photographs of the expedition.

The Heart of the Antarctic Sir Ernest Shackleton 1999

Frustrated by the failure of the Endurance expedition under Scott, Shackleton's own attempt to reach the South Pole is recounted here. Ultimately he came within 97 miles, but had to race back against the approaching winter to get back to camp before the ship sailed.

The Heart of the Great Alone

David Hempleman-Adams

2009-10-27 A treasure trove of photographs—some never before reproduced in book form—from the two greatest Antarctic expeditions. Among the greatest achievements in the history of photography, those of the early polar explorers surely stand out, for the beauty of their images and the almost impossible conditions they encountered. And none of these are more remarkable than the photographs recorded by the official chroniclers of two epic Antarctic expeditions—that of Robert Falcon Scott, departed in 1910, which tragically resulted in his death; and, four years later, that of Ernest Shackleton, whose heroic sea journey from Elephant Island to South Georgia has become the stuff of legend. Their photographers—Herbert George Ponting and Frank Hurley—transported bulky cameras and glass plate negatives

across the forbidding polar landscape to record some of the earliest images of this dramatic environment. That the photographs survived to be presented on their return to King George V is miraculous, and they have remained ever since in the Royal Collection. The Heart of the Great Alone reproduces the best of these marvelous images, some of which have never appeared in book form before—ships encased in ice floes, ice cliffs and ravines, campsites and dog sleds, and the incomparable beauty of Antarctic flora and fauna. Together they form an invaluable record of an environment that global warming has forever changed. With a superb narrative drawing on Ponting's and Hurley's writings and other unique archival material from the Royal Collection, and with extended captions for each image, this book is a unique addition to the literature of polar exploration.

The Heart of the Antarctic Sir Ernest Henry Shackleton 1909 The British Antarctic Expedition of 1907-9, led by Ernest H. Shackleton, left Port Lyttelton, New Zealand, in the ship Nimrod on January 1, 1908. On February 3, the Nimrod deposited Shackleton and a party of 14 men at Cape Royds, on Ross Island. The men divided into three groups. One would try to reach the South Pole, a second went north to reach the South Magnetic Pole, while a third was to explore the mountains west of McMurdo Sound. Shackleton, three companions, and four ponies set out for the South Pole on October 29. Enduring great hardship, on January 9, 1909, they attained a latitude of 88°23' S., farther south than any previous expedition. There they were forced to turn back by

fierce blizzards and low supplies. They made their way back to the Nimrod and returned safely to New Zealand. In addition to coming to within 97.5 nautical miles (180.6 kilometers) of the pole, the expedition registered two other significant achievements. On March 5-11, 1908 the party of Douglas Mawson, Edgeworth David, and Alistair Mackay made the first ascent of the 3,794-meter Mount Erebus, the most active volcano in Antarctica; and on January 16, 1909, the same three men reached the South Magnetic Pole. The Heart of the Antarctic is Shackleton's two-volume account of the expedition, written on the passage by ocean liner from New Zealand back to Britain and published in October 1909. On December 14, 1911, the Norwegian Roald Amundsen and four companions finally reached the pole.
