Borders, Migration and Globalization Anna Rita Calabrò 2021-12-10 The emergence of new and substantial human migration flows is one of the most important consequences of globalisation. While ascribable to widely differing social and economic causes, from the forced migration of refugees to upper-middle-class migration projects and the movement of highly skilled workers, what they have in common is the effect of contributing to a substantial global redefinition in terms of both identity and politics. This book contains contributions from scholars in the fields of law, social sciences, the sciences, and the liberal arts, brought together to delineate the features of the migration phenomena that will accompany us over the coming decades. The focus is on the multifaceted concept of 'border' as representing a useful stratagem for dealing with a topic like migration that requires analysis from several perspectives. The authors discuss the various factors and issues which must be understood in all their complexity so that they can be governed by all social stakeholders, free of manipulation and false consciousness. They bring an interdisciplinary and comparative perspective to the social phenomena such as human trafficking, unaccompanied foreign minors, or ethnic-based niches in the job market. The book will be a valuable guide for academics, students and policy-makers.

The New Immigration CAROLA SUAREZ-OROZCO 2012-11-12
At the turn of the millennium, the United States has the largest number of immigrants in its history. As a consequence, immigration has emerged once again as a subject of scholarly inquiry and policy debate. This volume brings together the dominant conceptual and theoretical work on the "New Immigration" from such disparate disciplines as anthropology, demography, psychology, and sociology. Immigration today is a global and transnational phenomenon that affects every region of the world with unprecedented force. Although this volume is devoted to scholarly work on the new immigration in the U.S. setting, any of the broader conceptual issues covered here also apply to other post-industrial countries such as France, Germany, and Japan.

Children's Voices from the Past Kristine Moruzi 2019-04-23
This book explores a central methodological issue at the heart of studies of the histories of children and childhood. It questions how we understand the perspectives of children in the past, and not just those of the adults who often defined and constrained the parameters of youthful lives. Drawing on a range of different sources, including institutional records, interviews, artwork, diaries, letters, memoirs, and objects, this interdisciplinary volume uncovers the voices of historical children, and discusses the challenges of situating these voices, and interpreting juvenile agency and desire. Divided into four sections, the book considers children's voices in different types of historical records, examining children's letters and correspondence, as well as multimedia texts such as film, advertising and art, along with oral histories, and institutional archives.

Globalization and Education Marcelo Sánchez Sorondo 2007-01-01
This book presents the results of a joint meeting organized by the Pontifical Academy of Sciences and the Pontifical Academy of Social Sciences where renowned international scholars discussed the importance of education in an increasingly globalized world. The papers cover a wide range of topics, including immigration, education in developing countries, knowledge transfer, social, economic, cultural, and political conditions in global education, technology, communication, access to information and knowledge, as well as, bio-anthropological issues.

Forced Migration and Social Trauma Andreas Hamburger 2018-10-31
Forced Migration and Social Trauma addresses the topic of social trauma and migration by bringing together a broad range of interdisciplinary and international contributors, comprising refugee care practitioners, trauma researchers, sociologists and specialists in public policy from all along the Balkan refugee route into Europe. It gives the essence of a moderated dialogue between psychologists and psychoanalysts, sociologists, public policy and refugee care experts. Migration is connected to social trauma and cannot be handled without being aware of this context. The way refugees are treated in the transit or target countries is often determined by the socio-traumatic history of these countries. Social trauma can be collectively committed and perpetuated, leaving transgenerational traces in posttraumatic and attachment
disorders, uprootedness and loss of social and political confidence. Media and cultural artefacts like press, TV and the internet influence collective coping as well as traumatic perpetuation. This book shows how xenophobia in the refugee receiving or transit countries can be caused by projection rather than by experience, and that the way refugees are received and regarded in a country may be connected to the country's cultural-traumatic history. Refugees, who are often individually and collectively traumatised, experience multiple re-enactments; however, such retraumatisations between refugees and receiving populations or institutions often remain unaddressed. The split between welcoming and hostile attitudes sometimes leads to unconscious institutional defences, such as lack of cooperation between medical, psychotherapeutic, humanitarian and legal institutions. An interdisciplinary and international exchange on migration and social trauma is necessary on all levels – this book gives convincing examples of this dialogue. Forced Migration and Social Trauma will be of great interest to all who are involved in the modern issues of refuge and migration.

**Migrations: Interdisciplinary Perspectives** Michi Messer 2012-05-26 This volume covers the most important contributions to and discussions at the international symposium Migrations: Interdisciplinary Perspectives (1-3, July, University of Vienna), organised by Renée Schroeder and Ruth Wodak which was dedicated to the multiple interdisciplinary dimensions of ‘migrations’, both from the viewpoints of the Social Sciences and Humanities as well as from the manifold perspectives of the Natural Sciences. The book is organized along the following dimensions: Urban Development and Migration Peer Relations in Immigrant Adolescents: Methodological Challenges and Key Findings Migration, Identity, and Belonging Migration in/and Ego Documents Debating Migration Fundamentals of Diffusion and Spread in the Natural Sciences and beyond Media Representations of Migrants and Migration Migration and the Genes **Global Perspectives on Gender and Work** Jacqueline Goodman 2000-04-16 Central to all our lives, work affects our status in the state, the family, and the economy. This comprehensive reader examines the myriad ways in which work—whether it is well-paid, unpaid, or underpaid—profoundly influences our roles in both the public and private spheres. Jacqueline Goodman has selected a key set of essays that examine influential arguments on such central themes as (1) the origins of the gendered division of labor; (2) historical trends and economic transformations that affect and are affected by women's position in market and non-market work; (3) the effects of occupational and job segregation by sex on status, pay, and promotion; (4) the ways in which formal and informal organizational culture shape and in turn are shaped by gender in professional and managerial positions; (5) class consciousness among wage-earning men and women; (6) the different forms of gender discrimination that women and men face in the workplace; (7) the problems working parents face and the ways in which different societies, subcultures, and genders cope; and (8) alternative approaches to improving the lives of working women and their families in the global economy. With its rich interdisciplinary perspective, this text is ideal for courses in sociology, political science, anthropology, and women's and gender studies. The rapid rise in immigration over the past few decades has transformed the American social landscape, while the need to understand its impact on society has led to a burgeoning research literature. Predominantly non-European and of varied cultural, social, and economic backgrounds, the new immigrants present analytic challenges that cannot be wholly met by traditional immigration studies. Immigration Research for a New Century demonstrates how sociology, anthropology, history, political science, economics, and other disciplines intersect to answer questions about today's immigrants. In Part I, leading scholars examine the emergence of an interdisciplinary body of work that incorporates such topics as the social construction of race, the importance of ethnic self-help and economic niches, the influence of migrant-homeland ties, and the types of solidarity and conflict found among migrant populations. The authors also explore the social and national origins of immigration scholars themselves, many of whom came of age in an era of civil rights and ethnic reaffirmation, and may also be immigrants or children of immigrants. Together these essays demonstrate how social change, new patterns of immigration, and the scholars' personal backgrounds have altered the scope and emphases of the research literature, allowing scholars to ask new questions and to see old problems in new ways. Part II contains the work of a new generation of immigrant scholars, reflecting the scope of a field bolstered by different disciplinary styles. These essays explore the complex variety of the immigrant experience, ranging from itinerant farmworkers to Silicon Valley engineers. The demands of the American labor force, ethnic, racial, and gender stereotyping, and state regulation are all shown to play important roles in the economic adaptation of immigrants. The ways in which immigrants participate politically, their relationships among themselves, their attitudes toward naturalization and citizenship, and their own sense of cultural identity are also addressed. Immigration Research for a New Century examines the complex effects that immigration has had not only on American society but on scholarship itself, and offers the fresh insights of a new generation of immigration researchers.
Jewish Diasporas to Germany and Israel, examining the roles of origin, ethnicity, and destination in the acculturation and adaptation of immigrants. The book presents results from various projects within a large research consortium that compared the adaptation of Diaspora immigrants with that of other immigrant groups and natives in Israel and Germany. With close attention to specific issues relating to Diaspora immigration, including language acquisition, acculturation strategies, violence and 'breaches with the past', educational and occupational opportunities, life course transitions and preparation for moving between countries, The Challenges of Diaspora Migration will appeal to scholars across the social sciences with interests in migration and ethnicity, Diaspora and return migration.

Urban Cultures Of/in the United States Andrea Carosso 2010 This book collects the efforts of a team of scholars working at the University of Torino under the auspices of the Project WWS (World-Wide Style). Focusing on diverse areas of inquiry into the transformations of the American city, the essays in this volume provide perspectives for understanding the complexity of urban cultures in the United States in the late 19th, 20th and early 21st centuries. Organized thematically, this book includes contributions in three main areas. The first area covers studies in U.S. history and history of ideas at the turn of the 20th century, in light of its migration/immigration processes as well as in its representations of national greatness and cultural hegemony as reflected in World's Fairs. The second area covers analyses of American literature in the double perspective of the recent emergence of a new form of «global novel», as well as the developments of new subgenres of urban fiction. A third area on inquiry focuses on new practices of organized religion in North America arising from the regionalization of the American metropolis in recent decades.

Interdisciplinary Perspectives on Child Migrants Mary Grace Antony 2018 As global societies grapple with unprecedented numbers of migrants, children constitute a largely overlooked demographic in immigration scholarship. This timely interdisciplinary anthology addresses this lapse through analyses of media representations, personal narratives, and resettlement policies pertaining to child migrants and refugees.

Race in France Herrick Chapman 2004-06-01 Scholars across disciplines on both sides of the Atlantic have recently begun to open up, as never before, the scholarly study of race and racism in France. These original essays bring together in one volume new work in history, sociology, anthropology, political science, and legal studies. Each of the eleven articles presents fresh research on the tension between a republican tradition in France that has long denied the legitimacy of acknowledging racial difference and a lived reality in which racial prejudice shaped popular views about foreigners, Jews, immigrants, and colonial people. Several authors also examine efforts to combat racism since the 1970s.

Immigration and the Transformation of Europe Craig A. Parsons 2006-08-31 A new kind of historic transformation is underway in twenty-first-century Europe. Twentieth-century Europeans were no strangers to social, economic
and political change, but their major challenges focused mainly on the intra-European construction of stable, prosperous, capitalist democracies. Today, by contrast, one of the major challenges is flows across borders - and particularly in-flows of non-European people. Immigration and minority integration consistently occupy the headlines. The issues which rival immigration - unemployment, crime, terrorism - are often presented by politicians as its negative secondary effects. Immigration is also intimately connected to the profound challenges of demographic change, economic growth and welfare-state reform. Both academic observers and the European public are increasingly convinced that Europe's future will largely turn on how it admits and integrates non-Europeans. This book is a comprehensive stock-taking of the contemporary situation and its policy implications.

Globalization Marcelo Suarez-Orozco 2004-04-01 Globalization defines our era. While it has created a great deal of debate in economic, policy, and grassroots circles, many aspects of the phenomenon remain virtual terra incognita. Education is at the heart of this continent of the unknown. This pathbreaking book examines how globalization and large-scale immigration are affecting children and youth, both in and out of schools. Taking into consideration broad historical, cultural, technological, and demographic changes, the contributors—leading social scientists in their fields—suggest that these global transformations will require youth to develop new skills, sensibilities, and habits of mind that are far ahead of what most educational systems can now deliver. Drawing from comparative and interdisciplinary materials, the authors examine the complex psychological, sociocultural, and historical implications of globalization for children and youth growing up today. The book explores why new and broader global visions are needed to educate children and youth to be informed, engaged, and critical citizens in the new millennium. Asian America Pawan Dhingra 2014-04-14 Asian Americans are the fastest growing minority population in the country. Moreover, they provide a wonderful lens on the experiences of immigrants and minorities in the United States more generally, both historically and today. In this timely new text, Pawan Dhingra and Robyn Magalit Rodriguez critically examine key sociological topics through the experiences of Asian Americans, including social hierarchies (of race, gender, and sexuality), work, education, family, culture, identity, media, pan-ethnicity, social movements, and politics. With vivid examples and lucid discussion of a broad range of theories, the authors demonstrate the contributions of the discipline of sociology to understanding Asian Americans, and vice versa. In addition, this text takes students beyond the boundaries of the United States to cultivate a comparative and global understanding of the Asian experience, as it has become increasingly transnational and diasporic. Bridging sociology and the growing interdisciplinary field of Asian American studies, and uniquely placing them in dialogue with one another, this engaging text will be welcome in undergraduate and graduate sociology courses such as race and ethnic relations, immigration, and social stratification, as well as on ethnic studies courses more broadly.

Interdisciplinary Perspectives on the New Immigration: The new immigrant in American society Marcelo M. Suárez-Orozco 2001 This six-volume set focuses on Latin American, Caribbean, and Asian immigration, which accounts for nearly 80 percent of all new immigration to
the United States. The volumes contain the essential scholarship of the last decade and present key contributions reflecting the major theoretical, empirical, and policy debates about the new immigration. The material addresses vital issues of race, gender, and socioeconomic status as they intersect with the contemporary immigration experience. Organized by theme, each volume stands as an independent contribution to immigration studies, with seminal journal articles and book chapters from hard-to-find sources, comprising the most important literature on the subject. The individual volumes include a brief preface presenting the major themes that emerge in the materials, and a bibliography of further recommended readings. In its coverage of the most influential scholarship on the social, economic, educational, and civil rights issues revolving around new immigration, this collection provides an invaluable resource for students and researchers in a wide range of fields, including contemporary American history, public policy, education, sociology, political science, demographics, immigration law, ESL, linguistics, and more.

**Immigration, Incorporation and Transnationalism**

Elliott Robert Barkan 2017-07-05 Immigration, Incorporation and Transition is an intriguing collection of articles and essays. It was developed to commemorate the twenty-fifth anniversary of The Journal of American Ethnic History. Its purpose, like that of the Immigration and Ethnic History Society, is to integrate interdisciplinary perspectives and exciting new scholarship on important themes and issues related to immigration and ethnic history.

**Immigration, Diversity, and Education**

Elena L. Grigorenko 2009-09-10 This edited volume presents an overview of research and policy issues pertaining to children from birth to 10 who are first- and second-generation immigrants to the U.S., as well as native-born children of immigrants. The contributors offer interdisciplinary perspectives on recent developments and research findings on children of immigrants. By accessibly presenting research findings and policy considerations in the field, this collection lays the foundation for changes in child and youth policies associated with the shifting ethnic, cultural, and linguistic profile of the U.S. population.

Social Trauma – An Interdisciplinary Textbook Andreas Hamburger 2020-11-23 This book explores the intersection of clinical and social aspects of traumatic experiences in postdictatorial and post-war societies, forced migration, and other circumstances of collective violence. Contributors outline conceptual approaches, treatment methods, and research strategies for understanding social traumatizations in a wider conceptual frame that includes both clinical psychology and psychiatry. Accrued from a seven year interdisciplinary and international dialogue, the book presents multiple scholarly and practical views from clinical psychology and psychiatry to social and cultural theory, developmental psychology, memory studies, law, research methodology, ethics, and education. Among the topics discussed: Theory of social trauma Psychoanalytic and psychotherapeutic approaches to social trauma Memory studies Developmental psychology of social trauma Legal and ethical aspects Specific methodology and practice in social trauma research Social Trauma: An International Textbook fills a critical gap between clinical and social theories of trauma, offering a basis for university teaching as well as an overview for all who are involved in the modern issues of victims of social violence. It will be a
useful reference for students, teachers, and researchers in psychology, medicine, education, and political science, as well as for therapists and mental health practitioners dealing with survivors of collective violence, persecution, torture and forced migration.

**The End of American Childhood** Paula S. Fass 2017-11-07

How American childhood and parenting have changed from the nation's founding to the present. The End of American Childhood takes a sweeping look at the history of American childhood and parenting, from the nation's founding to the present day. Renowned historian Paula Fass shows how, since the beginning of the American republic, independence, self-definition, and individual success have informed Americans' attitudes toward children. But as parents today hover over every detail of their children's lives, are the qualities that once made American childhood special still desired or possible? Placing the experiences of children and parents against the backdrop of social, political, and cultural shifts, Fass challenges Americans to reconnect with the beliefs that set the American understanding of childhood apart from the rest of the world. Fass examines how freer relationships between American children and parents transformed the national culture, altered generational relationships among immigrants, helped create a new science of child development, and promoted a revolution in modern schooling. She looks at the childhoods of icons including Margaret Mead and Ulysses S. Grant—who, as an eleven-year-old, was in charge of his father's fields and explored his rural Ohio countryside. Fass also features less well-known children like ten-year-old Rose Cohen, who worked in the drudgery of nineteenth-century factories. Bringing readers into the present, Fass argues that current American conditions and policies have made adolescence socially irrelevant and altered children's road to maturity, while parental oversight threatens children's competence and initiative. Showing how American parenting has been firmly linked to historical changes,
The End of American Childhood considers what implications this might hold for the nation's future.
