Storytelling in Yellowstone Lee H. Whittlesey 2007 Long before snowmobiles, paved roads, and SUVs were introduced into Yellowstone National Park, a myriad of companies offered buggy and stage rides through the Park, with their drivers telling stories to their passengers. Some of these stories had no basis in fact, especially those attributed to "Indian legends," but others came from the early trappers and fur traders and were as informational as they were entertaining. Lee Whittlesey, Yellowstone National Park historian, has devoted years of research to these pre-1920 stories told by the Park's "tour guides," or interpreters. He includes the campfire stories of the traders and trappers, Yellowstone as it was portrayed in early photos and movies, the first group of Yellowstone guidebooks written, and the "fool tenderfoot questions" posed by the late nineteenth-century tourists. Whittlesey devotes chapters to the first two National Park interpreters, Philetus "Windy" Norris and G. L. Henderson. Each had his own style of delivery and each awed his respective tour groups. And, finally, there are the stagecoach drivers who chauffeured the public over Yellowstone's dirt roads and engaged their passengers with tales of the great Geyserland. Today's National Park Service has taken over the duties of the "horse and buggy tour guides" but private and concessioner tour guides also share Yellowstone National Park's many stories. All author proceeds from this book are being donated to the National Park Service.

Women Rewriting Boundaries Precious McKenzie Stearns 2016-12-14 Women Rewriting Boundaries expands the work of gender and literary scholars by offering fresh insights on how to read travel writing by women. It analyzes the connections between class, gender, physicality, and sexuality as found in nineteenth-century literature. The authors discuss the myriad ways in which women writers reinforced and challenged Victorian social norms. Inspired by a special topics panel, “Women Writing Boundaries,” presented at the 2013 Rocky Mountain Modern Language Association’s annual convention, this edited collection will be a thought-provoking resource for college- level humanities and gender studies students and their instructors.
Women and Indians on the Frontier, 1825-1915 Glenda Riley 1984
Pioneer women going west carried distinct images of themselves and of American Indians. Their views reflected stereotypes pervading the popular literature and journalism of the nineteenth century: women were weak and defenseless, their westward trek was a noble mission, and American Indians were savages. But as a result of their frontier experience, many women changed or discarded their earlier opinions. This book is the first account of how and why pioneer women altered their self-images and their views of American Indians. In Women and Indians on the Frontier, Riley substantially revises the conventional melodramatic picture of pioneer women cowering when confronted with Indians. Frontier life required women to be self-reliant, independent, and hardy: as they learned to adapt, frontierswomen also learned to reexamine stereotypes in the light of experience. Interestingly, Riley explains, while pioneer women frequently changed their beliefs about Indians, they did not often revise their attitudes toward Mormon or Mexican women following contact with them. Frontierswomen also differed from men, whose unfavorable impression of Indians seldom changed. Riley's work is an important addition to Western history, women's studies, and American Indian studies. She examines in detail images and myths of both women and Indians, using examples from history, literature, and film, complemented by period photographs and illustrations. Her comparative account will interest a variety of scholars concerned with cultures in conflict and transition. The Nautical Magazine 1888

Thomas Jefferson Lawrence S. Kaplan 1999 Although Jefferson was not the sole formulator of American diplomacy, his voice was the most pervasive in the first generation of the republic's history. It may also have been the most paradoxical. In this volume, Kaplan reconciles the contradictions in Jefferson's views and positions over a period of almost half a century. He also explores how the concept of the United States' westward expansion worked as the moving force in forming Jefferson's judgments and actions in foreign relations. Readable and authoritative, Thomas Jefferson: Westward the Course of Empire offers new insight into the man who shaped American foreign policy. The Ohio Company of Virginia and the Westward Movement, 1748-1792 Kenneth P. Bailey 2017-10-26 Excerpt from The Ohio Company of Virginia and the Westward Movement, 1748-1792: A Chapter in the History of the Colonial Frontier The history of the company varied inversely to England's success against France. When England's position was insecure, the company received British approval and support, but when Britain's star was in the ascendant, favoritism toward the company waned. After 1763, having outlived its raison d'etre, it was allowed to die a natural death through neglect and the endless litigation in which it became involved. Manifest Destiny Shane Mountjoy 2009 As the population of the 13 colonies grew and the economy developed, the desire to expand into new
land increased. Nineteenth-century Americans believed it was their
divine right to expand their territory from the Atlantic Ocean to the
Pacific. "Manifest destiny," a phrase first used in 1839 by journalist John
O'Sullivan, embodied the belief that God had given the people of the
United States a mission to spread a republican democracy across the
continent. Advocates of manifest destiny were determined to carry out
their mission and instigated several wars, including the war with Mexico
to win much of what is now the southwestern United States. In Manifest
Destiny: Westward Expansion, learn how this philosophy to spread out
across the land shaped our nation.

Lions of the West Robert Morgan 2012-08-21 From Thomas Jefferson’s
birth in 1743 to the California Gold Rush in 1849, America’s westward
expansion comes to life in the hands of a writer fascinated by the way
individual lives link up, illuminate one another, and collectively impact
history. Jefferson, a naturalist and visionary, dreamed that the United
States would stretch across the North American continent, from ocean to
ocean. The account of how that dream became reality unfolds in the
stories of Jefferson and nine other Americans whose adventurous spirits
and lust for land pushed the westward boundaries: Andrew Jackson, John
“Johnny Appleseed” Chapman, David Crockett, Sam Houston, James K.
Polk, Winfield Scott, Kit Carson, Nicholas Trist, and John Quincy Adams.
Their stories—and those of the nameless thousands who risked their lives
to settle on the frontier, displacing thou- sands of Native
Americans—form an extraordinary chapter in American history that led
directly to the cataclysm of the Civil War. Filled with illustrations,
portraits, maps, battle plans, notes, and time lines, Lions of the West is a
richly authoritative biography of America—its ideals, its promise, its
romance, and its destiny.

Nature's Noblemen  
Monica Rico  
2013-07-16  
DIV  
In this fascinating book, Monica Rico explores the myth of the American West in the nineteenth century as a place for men to assert their masculinity by "roughing it" in the wilderness and reveals how this myth played out in a transatlantic context. Rico uncovers the networks of elite men who circulated between the West and the metropoles of London and New York. Each chapter tells the story of an individual who, by traveling these transatlantic paths, sought to resolve anxieties about class, gender, and empire in an era of profound economic and social transformation. All of the men Rico discusses—from the well known, including Theodore Roosevelt and Buffalo Bill Cody, to the comparatively obscure, such as English cattle rancher Moreton Frewen—envisioned the American West as a global space into which redemptive narratives of heroic upper-class masculinity could be written.

The Frontiers of Women's Writing  
Brigitte Georgi-Findlay  
1996-05  
A study of American women's writings about the West between 1830 and 1930 reviews the diaries of the overland trails; letters and journals of the wives of army officers during the Indian wars; professional travel writings, and late 19th- and early 20th-century accounts of missionaries and teachers on Indian reservations.

Westward Vision  
David Lavender  
1985-01-01  
In one very real sense, the story of the Oregon Trail begins with Columbus. This opening suggests the panoramic sweep of his history of that famous trail. In chiseled, colorful prose, Lavender illustrates the "westward vision" that impelled the early explorers of the American interior looking for a northwest passage and send fur trappers into the region charted by Lewis and Clark. For the emigrants following the trappers' routes, that vision gradually grew into a sense of a manifest American destiny. Lavender describes the efforts of emigration societies, of missionaries like Marcus and Narcissa Whitman, and of early pioneer settlers like Hall Jackson Kelley, Jason Lee, and Thomas Jefferson Farnham, as well as the routes they took to the Promised Land. He concludes by recounting the first large-scale emigrations of 1843-45, which steered the U. S. government for war with Mexico and agreements with Britain over the Oregon boundary.
