Helping Children Learn to Read Beverly S. Ameer 1990
Television and the Classroom Reading Program: If You Can't Beat 'em, Join 'em. by George J. Becker 1972

Recent research in cognitive development showed that how everyday literacy sessions can be made more exciting, dynamic and effective by using a wide range of media and visual texts in the primary classroom. In addition to a wealth of practical teaching ideas, the book outlines the vital importance of visual texts and shows how children can enjoy developing essential literacy skills through studying picture books, film, television and comic books. Designed to take into account the revised framework for literacy, each chapter offers a complete guide to teaching this required area of literacy. Aimed at those who want to deliver high quality and stimulating literacy sessions, each chapter contains a range of detailed practical activities and resources which can be easily implemented into existing literacy teaching with minimal preparation. In addition, each chapter gives clear, informative yet accessible insights into the theory behind visual literacy. Including a survey of research into visual literacy for teachers in both Key Stage 1 and Key Stage 2, this book examines how children's literacy skills can be developed and extended through exploiting a range of innovative tools. From the simple techniques of a class chart to the complex methods of digital video, film and graphic novels, the book contains practical teaching ideas, activities and planning suggestions which can be easily implemented by primary teachers. Both print and visual literacy skills play a central role in developing children's understanding of the world. In the classroom, film and television comic books are powerful tools which can be used to adapt texts to different age groups. This book provides valuable advice and guidance to help teachers to plan, implement and evaluate their use of television and film as a vital part of the literacy curriculum.

Writing Research Papers James R. Louter 1983 ‘The definitive research paper guide for your course, Writing Research Papers combines a traditional and practical approach to the research process with the latest information on electronic research and presentations. This market-leading text provides you with step-by-step guidance through the research writing process, from selecting and narrowing a topic to formatting the finished document. It includes an extremely thorough and accurate coverage of citation styles for a wide variety of disciplines.’ Publisher description

Teaching Children to Read: An Evidence-based Assessment of the Scientific Research in Education

A critical childhood includes a multimedia approach to learning. In the Introduction to the Classic Edition, Beverly Bavelier outlines the vital importance of visual texts and shows how children can enjoy developing essential literacy skills through studying picture books, film, television and comic books. Designed to take into account the revised framework for literacy, each chapter offers a complete guide to teaching this required area of literacy. Aimed at those who want to deliver high quality and stimulating literacy sessions, each chapter contains a range of detailed practical activities and resources which can be easily implemented into existing literacy teaching with minimal preparation. In addition, each chapter gives clear, informative yet accessible insights into the theory behind visual literacy. Including a survey of research into visual literacy for teachers in both Key Stage 1 and Key Stage 2, this book examines how children's literacy skills can be developed and extended through exploiting a range of innovative tools. From the simple techniques of a class chart to the complex methods of digital video, film and graphic novels, the book contains practical teaching ideas, activities and planning suggestions which can be easily implemented by primary teachers. Both print and visual literacy skills play a central role in developing children's understanding of the world. In the classroom, film and television comic books are powerful tools which can be used to adapt texts to different age groups. This book provides valuable advice and guidance to help teachers to plan, implement and evaluate their use of television and film as a vital part of the literacy curriculum.
