Psychology of the Future: Stanislav Grof 2019-07-28 Summarizes Grof’s experiences and observations from more than thirty years of research in non-ordinary states of consciousness. It provides a comprehensive overview of Grof’s findings, including research from his early days withAlexander Shulgin, his work with psychedelic drugs, and his extended work with holotropic breathwork. Grof’s account of his findings is written in accessible language, making it understandable for both professionals and laypeople. He includes in his model the recollective level, or the reliving of emotionally relevant events. Grof’s findings have been influential in the field of psychology, especially his central concept of holotropic experience, which involves transcending time and space. Grof maintains that the current basic assumptions and concepts of psychology and psychiatry require a radical revision based on the intensive and systematic research of holotropic experience. He suggests that a radical re-evaluation is needed to understand the healing capacity of the psyche.

PSYCHOLOGY is a subdiscipline of philosophy that has been dedicated to the study of exceptional human experiences and functions. Theorists have sought to expand psychological science and practice beyond the pursuits of conventional psychology. The field has recognized a variety of challenges and has become more cohesive as a result of its modernization. Among the most compelling of these challenges is the search for the nature of existence. Insights from research into nonordinary states of consciousness have contributed to our understanding of how people experience existence. Key researchers in this field have written about existential group therapy. International developments in theory, practice, and research are also examined.

The leaders of existential group therapy include Stanislav Grof, Jorge N. Ferrer, and Paul F. Cunningham. Grof and Ferrer have trained with the director of existential therapy, Donald Moss, and are involved in the field of existential group therapy. Grof and Ferrer have written extensively on the topic of existential group therapy. The book is divided into three parts: the first covers historical and philosophical foundations of existential group therapy. The second part includes biographical and critical analysis. Part three deals with impact and future of existential group therapy.
