community units and exposes the differences among Native Americans, Yankees, and Scandinavians. Lived experiences of marriage, motherhood, mourning, mourning, and mourning, bringing about a new world of faith and practice, of revelation and expulsion and exile, and rape and violence, transnational immigration, establishing “civilization” in a wilderness, and missionizing both to new neighbors and far away peoples. Gender defines, limits, and opens opportunities for private expression, public discourse, and popular culture. Cultural prejudices collide with doctrinal imperatives against backdrops of changing social norms, emerging professional identities, and developing ritualization and sacralization of lived religion. The stories, experiences, and examples explored in Mormon Women’s History and American Politics offer compelling ways that Mormon women’s history can move beyond individual lives to enframe larger historical questions.

Indian Slavery in Colonial America Alan Gallay 2009-01-01 European enslavement of American Indians began with Christopher Columbus’s arrival in the New World. The slave trade expanded with European colonies, and though African slave labor filled many needs, huge numbers of America’s indigenous peoples continued to be captured and forced to work as slaves. Although central to the process of colonization in the Americas, the transatlantic slave trade in America claimed many shorter and longer lives. This book explores both the Native and European societies and their interactions, as well as relations between and among Native groups.

Manifest Destinies: Laura G. Gómez 2008-09-30 Laura Gómez explores the central paradox of Mexican American racial status as entailing the law’s designation of Mexican Americans as “white” and their simultaneous social position as non-white in American society. She tells a neglected story of conflict, conquest, cooperation, and competition among Mexicans, Indians, and Euro-Americans, the region’s three main populations who were the key architects and victors of this bastard democracy. This book narrates one woman’s race to the top, and Gómez’s path breaking work—spanning the disciplines of law, history, and sociology—reveals how the construction of Mexicans as an American racial group propelled central to the larger process of restructuring the American racial order from the Mexican War (1848-48) to the early twentieth century. The emphasis on woman-on-black relations during this period has obscured the significant role played by the doctrine of Manifest Destiny and the colonization of northern Mexico in the racial subordination of black Americans.

Andrés Reséndez 2021-04-07 En 1542, soit un demi-siècle après le premier voyage de Christophe Colomb dans le Nouveau Monde, les monarques ibériques interdirent l’esclavage des Indiens aux États d’Amérique. Mais à partir de la seconde moitié du XIXe siècle, cet esclavage de masse a décimé les populations amérindiennes aussi sûrement que les maladies apportées et transmises par les Européens : à travers des documents inédits, ce récit terrible et passionnant apporte la preuve. Alors que de nombreux pays, et les États-Unis en particulier, sont aux prises avec l’héritage du passé, Andrés Reséndez dévoile un chapitre essentiel d’une histoire douloureuse à laquelle il est plus que jamais nécessaire de se confronter.

The Whites Want Every Thing William Bagley 2010-10-17 Colonial historians argue that the American West was settled by a race of conquerors who behaved like conquerors. This book proves that this is not the case. The western United States and its resources were settled by a race of reformers who believed in the American idea of republicanism. This book describes the ways in which the US government worked to establish the political, economic, and social foundations of the West.”
