Slow Travels-California and Nevada Lyn Wilkerson 2010-08-30 This edition in the Slow Travels series is an update of our California guide, now combined with Nevada into one. Much of the text is edited from the American Guide Series of the 1930s and 40s, with updated historical information, improved directions, and material from additional sources. All locations have been verified using GPS coordinates, as well as from satellite imagery and first hand knowledge. The California section explores current U.S. 50 and 395, as well as the former routes of U.S. 40, 60, and 99 which are no longer designated as such. The cities of Los Angeles, San Francisco, Sacramento, and San Diego are explored along these routes. The Nevada section follows U.S. Highways 6 and 50 east to west across the state, and U.S. 93 and 95 north to south. In addition, the former route of U.S. 40 is retraced along the Humboldt River, the route of emigrants along the California Trail from Utah and Idaho. All routes include reference maps and GPS coordinates for all listed sites.

Pioneer Photographers of the Far West Peter E. Palmquist 2000 This extraordinarily comprehensive, well-documented, biographical dictionary of some 1,500 photographers (and workers engaged in photographically related pursuits) active in western North America before 1865 is enriched by some 250 illustrations. Far from being simply a reference tool, the book provides a rich trove of fascinating narratives that cover both the professional and personal lives of a colorful cast of characters.

Lawman John Boessenecker 1998 Harry Morse - gunfighter, manhunter, sleuth - was among the West's most famous lawmen. Elected sheriff of Alameda County, California, in 1864, he went on to become San Francisco's foremost private detective. His career spanned five decades. In this biography, John Boessenecker brings Morse's now-forgotten story to light, chronicling not only the lawman's remarkable adventures but also the turbulent times in which he lived. Armed only with raw courage and a Colt revolver, Morse squared off against a small army of desperadoes and beat them at their own game. He shot to death the notorious bandidos Narato Ponce and Juan Soto, outgunned the vicious
Narciso Bojorques, and pursued the Tiburcio Vasquez gang for two months in one of the West’s longest and most tenacious manhunts. Later, Morse captured Black Bart, America’s greatest stagecoach robber. Fortunately, Harry Morse loved to tell of his feats. Drawing on Morse’s diaries, memoirs, and correspondence, Boessenecker weaves the lawman’s colorful accounts into his narrative. Rare photographs of outlaws and lawmen and of the sites of Morse’s exploits further enliven the story. A significant contribution to both western history and the history of law enforcement, Lawman is also an in-depth treatment of Hispanic crime and its causes, immigration, racial prejudice, and police brutality - issues with which California, and the nation, still grapple today.

California Vines, Wines & Pioneers Sherry Monahan 2019-07-29
Grab your glass and take to the wine trail with food genealogist Sherry Monahan as she traces the roots of “California’s Vines, Wines & Pioneers.” While cowboys and early settlers were writing the oft-told history of the Wild West, California’s wine pioneers were cultivating a delicious industry. The story begins when Franciscan missionaries planted the first grapes in Southern California in 1769. Almost a century later, news of gold drew thirsty prospectors and European immigrants to California’s promise of wealth. From Old World vines sprang a robust and varied tradition of wine cultivation that overcame threats of pests and Prohibition to win global prestige. Journey with Monahan as she uncorks this vintage history and savors the stories of California’s historic wineries and vineyards.

San Francisco Bay is the largest and most productive estuary on the Pacific Coast of North America. It is also home to the oldest and densest urban settlements in the American West. Focusing on human inhabitation of the Bay since Ohlone times, Down by the Bay reveals the ongoing role of nature in shaping that history. From birds to oyster pirates, from gold miners to farmers, from salt ponds to ports, this is the first history of the San Francisco Bay and Delta as both a human and natural landscape. It offers invaluable context for current discussions over the best management and use of the Bay in the face of sea level rise.

Forgotten Pioneers Thomas F. Prendergast 2001-06
This is a comprehensive look at the Irish in Northern California from 1835 to 1900. Filled with anecdotes and insider history - this book is a unique piece of California history. The title, Forgotten Pioneers, embodies only half a truth in its application to the subject --- those early settlers in the wilderness of California, men of Irish birth or ancestry who contributed lavishly toward laying the foundations of a new commonwealth on the Pacific. It is the purpose of this book to reinstate in the rank where they belong, some, at least, of these overlooked men "whose character and achievement entitle them to the highest place in the respect and esteem of the people."

Hidden Treasures Harriet Baskas 2013-10-01 While there are more than 15,000 museums in our country, visitors get to see only about five percent of any institution's collections. Most museums simply don't have room to display everything they've got. However, there are a wide variety of surprising and intriguing reasons that, for example, the Smithsonian Institution doesn't display its collection of condoms, Florida's Lightner Museum locks up all but one of its shrunken heads, and a world-class stash of Japanese erotica (shunga) art was kept in the Honolulu Museum of Art's storage until only recently. Each item or collection included in this volume is described and placed in context with stories and interviews that explore the historical, social, cultural, political, environmental, or other circumstances that led to keeping that object or group of objects out of public view--the ultimate museum buff's voyeuristic experience. Color photographs of the artifacts are included.

Slow Travels--California Lyn Wilkerson 2009-07-29 Slow Travels--California explores this State's history along the present and previous routes of U.S. Highways 40, 50, 60, 99 and 395. U.S. Highways 40 and 50 parallel each other across the Mother Lode of the Sierra Nevadas, around Lake Tahoe, into the Sacramento Valley. From Sacramento, they take divergent routes to San Francisco and the Bay Area. U.S. 99 travels down the length of the Central Valley, and across the San Fernando Mountains into Los Angeles, before turning east to the Imperial Valley and Mexico. U.S. 395 covers two segments; the northern one along the eastern slope of the Sierra Nevadas to Reno, and the southern route through the Owens Valley, passing Death Valley, down to San Diego. Come explore the rich and varied history of the Golden State. This guide provides in-depth information about historic sites, landmarks, and legends along California's highways. And your purchase contributes $1 to the American Trails Preservation Trust.

Calaveras Gold Ronald H. Limbaugh 2003-10-01 California’s Calaveras County—made famous by Mark Twain and his celebrated Jumping Frog—is the focus of this comprehensive study of Mother Lode mining. Most histories of the California Mother Lode have focused on the mines around the American and Yuba Rivers. However, the “Southern Mines”—those centered around Calaveras County in the central Sierra—were also important in the development of California’s mineral wealth. Calaveras Gold offers a detailed and meticulously researched history of mining and its economic impact in this region from the first discoveries in the 1840s until the present. Mining in Calaveras County covered the full spectrum of technology from the earliest placer efforts through drift and hydraulic mining to advanced hard-rock industrial mining. Subsidiary industries such as agriculture, transportation, lumbering, and water supply, as well as a complex social and political structure, developed around the mines. The authors examine the roles of race, gender, and class in this frontier society; the generation and distribution of capital; and the impact of the mines on the development of political and cultural institutions. They also look at the impact of mining on the Native American population, the realities of day-to-day life in the mining camps, the development of agriculture and commerce, the occurrence of crime and violence, and the cosmopolitan nature of the
population. Calaveras County mining continued well into the twentieth century, and the authors examine the ways that mining practices changed as the ores were depleted and how the communities evolved from mining camps into permanent towns with new economic foundations and directions. Mining is no longer the basis of Calaveras’s economy, but memories of the great days of the Mother Lode still attract tourists who bring a new form of wealth to the region.

American Trails Revisited Lyn Wilkerson 2003-07 American Trails Revisited follows in the proverbial footsteps of the many explorers and pioneers who traveled across the American West. Based on the works of the Federal Writers Project in the 1940’s, this book organizes, updates, and enhances the original material to provide an easy-to-follow historical travel guide to the Western United States. Along with the history of the people and places you will find along the way, this book also includes information for local, state, and national parks. A portion of the proceeds from this book will be used to support local historical organizations, so that the history that you rediscover in your travels will remain for those who follow in your footsteps.
