Adriatic Pilot Supplement 1996 Roger Baker 1996-01-01 Adriatic Pilot is the standard guide to Croatia and the neighbouring countries of Slovenia, Montenegro and Albania and now celebrates 20 years of publication. It provides coverage of the eastern coast of Italy, and is the only guide to the Venice Lagoon and harbours adjacent to Istria, and at present is the only book that covers the entire Adriatic region in a single volume. Trevor and Dinah Thompson's thoroughly-researched work provides all the essential navigational information for yachtsmen visiting the area. This 5th edition has been fully revised to include up-to-date technical information and details of new marinas and their facilities. Revised harbour plans and many new photographs make this edition significantly different from the last. User-friendly charts at the introduction to each section are now cross-referenced to the larger scale plans in the text and page referencing is more comprehensive. Each coastal section is now color-coded and identifiable by color tabs that improve navigation around the book.

Historical Dictionary of the Republic of Croatia Robert Stallaerts 1995 The Republic of Croatia is one of the new countries which resulted from the collapse of the former Yugoslavia. The Croats trace their roots back many centuries and the depth of this resurgent nationalism helps explain why Yugoslavia split as it did and to some extent where it did.

The History of Navigation Dag Pike 2018-11-30 Today travellers by land, sea and air take accurate navigation for granted but it was not always thus. The author, a highly experienced sailor, sets out to record the development of navigational techniques from the earliest time, five millennia ago. As explorers started to venture offshore into the unknown they had to rely on the sun and stars for direction. From this pioneers turned to mathematics, astrolobes, sextants and increasing accurate clocks to measure latitude and later longitude. More recently major breakthroughs with electronic navigation, GPS and other satellite systems have revolutionised travel. Focusing primarily but not exclusively on marine navigation, the author weaves a fascinating course through the successes and failures of mankind's quest to explore his world. The result is a thoroughly entertaining and informative work which has no rival.

The History of Celestial Navigation P. Kenneth Seidelmann 2020-06-29

This edited volume charts the history of celestial navigation over the course of five centuries. Written by a group of historians and scientists, it analyzes how competing navigation systems, technologies, and institutions emerged and developed, with a focus on the major players in the US and the UK. The history covers the founding of the Royal Observatory; the first printing of a Nautical Almanac; the founding of the US and UK Nautical Almanac Offices; the creation of international standards for reference systems and astronomical constants; and the impact of 20th century technology on the field, among other topics. Additionally, the volume analyzes the present role and status of celestial navigation, particularly with respect to modern radio and satellite navigation systems. With its diverse authorship and nontechnical language, this book will appeal to any reader interested in the history of science, technology, astronomy, and navigation over the ages.

Byzantine Trade, 4th-12th Centuries Marlia Mundell Mango 2016-12-05

The 28 papers examine questions relating to the extent and nature of Byzantine trade from Late Antiquity into the Middle Ages. The Byzantine state was the only political entity of the Mediterranean to survive Antiquity and thus offers a theoretical standard against which to measure diachronic and regional changes in trading practices within the area and beyond. To complement previous extensive work on late antique long-distance trade within the Mediterranean (based on the grain supply, amphorae and fine ware circulation), the papers concentrate on local and international trade. The emphasis is on recently uncovered or studied archaeological evidence relating to key topics. These include local retail organisation within the city, some regional markets within the empire, the production and/or circulation patterns of particular goods (metalware, ivory and bone, glass, pottery), and objects of international trade, both exports such as wine and glass, imports such as materia medica, and the lack of importation of, for example, Sasanian pottery. In particular, new work relating to specific regions of Byzantium's international trade is highlighted: in Britain, the Levant, the Red Sea, the Black Sea and China. Papers of the 38th Spring Symposium of Byzantine Studies, held in 2004 at Oxford under the auspices of the Committee for Byzantine Studies.
