The Silenced Drums
Management of Minor Forest Produce for Sustainability

RC Roy 1994

Sanwar M. Jharwal 2008 Authentic and authoritative, this presentation shares a comprehensive overview of the extensive research undertaken by the Agro Economic Research Centers (AERCs) and the concerns confronting Indian agriculture. Established across the states in India to provide policy feedback to the Ministry of Agriculture, the AERCs generated many important research initiatives and debates over five decades. This second volume focuses on the problems confronted at the regional level by each of the participating states.

This book is primarily based on the functioning of the tribal economy and draws on the theories of dependency between the forest and the tribals.

INDIA 2022 Publications Division This is a Reference Annual, a yearbook carrying all the information of central government schemes, programmes and policies. Information of States and UTs is also included in the Reference Book.

Developmental Anthropology Uma J. Lele 2017-07-12 The rapid loss of tropical forests, particularly in the developing world, has been a global concern since the late 1980s and has prompted a variety of international initiatives to save the forests. In 1991, the World Bank responded to global concerns and to criticism by nongovernmental organizations by forming a conservation-oriented forest strategy. Managing a Global Resource is an outgrowth of the independent evaluation conducted by the World Bank's Operations Evaluation Department and discusses how effectively that strategy was implemented. In this detailed investigation, Uma J. Lele explores why the loss of forests and biodiversity has been so rapid in some developing countries (Brazil, Indonesia, and Cameroon) and not in others (China, India, and Costa Rica). She assesses future prospects for conservation in these six countries by critically examining their policies, institutional arrangements, and emerging national and international instruments to conserve forests and biodiversity. Together these six countries account for 25 percent of the world's forest cover and 44 percent of the world's population. Managing a Global Resource presents case studies of the forest sectors of each country in the context of overall development policies, interest groups, and governance issues. Lele's important contribution is to critically examine the trade-offs between the global objectives of conservation and the local objectives of development and private profit. In some forest-poor countries, in contrast, natural resource loss has led the countries on their own accord to adopt a variety of conservation-oriented policies and programs. Despite the greater congruence between the global and national objectives in these forest-poor countries, competing demands on their resources and the constraints on their policies, institutions, and human capital make it difficult for them to affect forest and biodiversity conservation. This volume makes it clear that Policies, Programmes, and Strategies for Tribal Development Nishakar Panda 2006 A primer on inflation accounting is available and various studies have been undertaken on different aspects of tribal development. But very few on the analysis of tribal problems vis-a-vis programmes/policies for their development has remained more or less unexplored. The present study has attempted to plug this critical gap. In this book the author has delved deeper into the genesis of tribal problems, critically examined the programmes for their development in the past and present and offered some valuable insights for lifting them out of the morass of poverty and stagnation. It has traced successive shifts in tribal development policies and strategies at different points of time. A thumbnail picture has been presented on impact of the programmes on the stakeholders through case studies conducted in a remote district of a poverty ridden state. The results of the field study tend to conceptualise that despite input in terms of money and material and the so called coveted efforts and endeavours of public servants, there is an abysmal mismatch between the objectives and achievement. We are still far away from the point of their conscientisation. The study will be of immense academic and practical worth. The comprehensive analysis and critical review presented in this book on an important aspect of tribal development and finally the policy prescriptions suggested make it imperative reading for economists, anthropologists, planners, policy makers, administrators and members of the academic and research organizations.

Tribal Economy of India Pannala Ramaiah 1981 Covers the Telangana Region in Andhra Pradesh, 1980

educationists and economists of our country. These essays reveal the role of planning and technology in agricultural and rural development during the era of planned economic development.

Indian Agriculture & Agri-Business Management, 2 Nd Ed. Diwase, S. 2014-05-01 The book 'Indian Agriculture and Agribusiness Management' aims at providing students of agribusiness, teachers, researchers, professionals and all those interested in the field of agriculture with a broader understanding of agribusiness as a system and the key concepts needed to successfully manage an agribusiness enterprise. It serves as a basis to gain a comprehensive understanding of how the agribusiness system operates and the challenges faced in the movement of food and fiber from the producer to the ultimate consumer. The first part of the book helps in understanding the context within which agribusinesses operate in India. It focuses on the breadth and scope of agribusiness in India, policy initiatives undertaken by the Indian Government and the legal framework within which they function. The second half of the book deals with the complex network of inter related activities performed on the farm and past the farm gate such as natural resource management, input management, marketing management, supply chain management and risk management, as well as the institutional linkages needed for the same. It addresses issues relevant to decision making in a rapidly changing, highly competitive market environment led by technological advancement in area such as information technology and biotechnology. It provides an insight into management challenges related to rising input costs and shifting consumer preferences. Cases pertaining to the best practices and potential strategies adopted by a few innovative, successful organizations have also been incorporated. The book also incorporates several case studies that highlight the various concepts discussed in the different chapters.

Agricultural Marketing 1994
