theoretical debates and political struggles in the real world.

Capitalism, Disenchantment and the Poetics of Freedom I

Ivan André Ascher 2007 This dissertation offers new interpretations of Karl Marx and Max Weber on the nature of capitalism and modernity. Through close readings of their principal works, I offer a critique of both the scientific claims and political visions commonly associated with these authors. Where Marx describes relations under capital as commodified, and where Weber paints the modern world as disenchanting, I argue that these diagnoses turn on a disavowal of the element of language in which both these processes and their analysis unfold. As my reading suggests, so long as human relations exist in language, neither commodification nor disenchantment can be complete. Similarly, where Marx describes the alienation of the working class and Weber describes the professionalization of politics, my reading suggests that so long as the division of labor and the rules of bureaucracy recur in language, there remains the possibility of resistance whenever interpretation is required.

Max Weber and Karl Marx

Karl Lowith 2002-11 This is a key text in modern interpretations of alienation in Marxist theory and rationalization in Weber’s sociology. It remains the best student introduction to the differences and comparisons between the two essential thinkers.

Mappers of Society

Ronald Fernandez 2003 Fernandez examines the lives and ideas of sociologists who shaped the main contours of the discipline. Weber, Marx, Durkheim, and Simmel fashioned the early ideas and approaches of sociology, and their ideas are still central to the discipline. Veblen, Mead, Goffman, and Berger added crucial conceptual approaches; they also serve to underscore the length and breadth of Sociology as a science.

Social Cohesion and Legal Coercion

Leon Shaskolsky Sheleff 2021-11 The book is a critical analysis of the work of Max Weber, Emile Durkheim and Karl Marx. It focuses on their separate analyses of the role of law in society, pointing out their faults and errors, and the resultant impact on modern social science. The author takes issue with Weber’s work on rationality, with Durkheim’s work on repressive and restitutive law, and with Marx’s work on social justice and law as part of the superstructure. In each section of the book he follows the implications that flow from a re-assessment and re-interpretation of their work for an understanding of society. The book is multi-disciplinary, making ample reference to law, sociology, anthropology, history, religion, ecology, criminology, philosophy and economics. Its various chapters discuss a wide range of themes, including rationality, tradition, science, political authority, conflict resolution, community, justice and altruism.

Karl Marx and Weber on Oriental Societies

Lutfi Sunar 2016-05-06 The Orient was central to the work of Marx and Weber, both figures building their theories around the question of why modernity appeared to emerge only in the West. While Marx’s account focused on the accumulation of capital in the West, Weber’s explanations for this phenomenon centered on Western rationalization. Extending recent work comparing the social theories of Marx and Weber, this book examines their approaches to Oriental societies, showing how, in spite of the differences in their respective theorizations of the historical and political development of the West, their work on the form of modern society in the Orient converges, each complementing the other. Fully conversant with recent scholarly work on Marx and Weber, this comprehensive re-examination of the points of convergence and departure in their work requires us to re-evaluate both their positions in the history of sociology and their relevance to contemporary social questions. As such, it will appeal to scholars of social and political theory and classical sociology.

Sociological Theory in the Classical Era

Laura Desfor Edles 2005 Sociological Theory in the Classical Era is a highly-acclaimed new text which utilizes the unique and increasingly popular text/reader approach. The book presents major readings by sociology’s key classical theorists, including Karl Marx, Emile Durkheim, Max Weber, Charlotte Perkins-Gilman, Georg Simmel, W.E.B. Du Bois, and George Herbert Mead. The corresponding text written by Laura Desfor Edles and Scott Applewhite gives students the analytical framework necessary for them to develop a more critical and gratifying understanding of the ideas advanced by these theorists.
