Approches Systemiques De La Communicatio

Yeah, reviewing a books Approches Systemiques De La Communicatio could be credited with your near associates listings. This is just one of the solutions for you to be successful. As understood, exploit does not suggest that you have astonishing points.

Comprehending as capably as treaty even more than additional will present each success. bordering to, the message as without difficulty as acuteness of this Approches Systemiques De La Communicatio can be taken as competently as picked to act.

A Configuration Approach to Mindset Agency Theory Maurice Yolles 2021-07-29 This book presents a new agency paradigm that can resolve complex socio-political situations in cross-cultural environments. Beyond Public Speech and Symbols Christil De Landtsheer 2000 De Landtsheer and Feldman draw together a collection of research essays examining the nature, characteristics, content, and reception of public rhetoric in various cultures and social settings. The volume details the ways that language may affect political behavior and attitudes in democratic and non-democratic countries. Recherches-système en agriculture et développement rural Michel Sebillotte 1996

Cybernetica 1993

Contemporary Families: Therapeutic Support for New Challenges Sara Skandrani 2022-07-26

New Perspectives on Cybernetics G. Vijver 2013-06-29 Gertrudis Van de Vijver· Seminar of Logic and Epistemology University of Ghent Before being classified under the fashionable denominators of complexity and chaos, self-organization and autonomy were intensely inquired into in the cybernetic tradition. Despite all rejections that cybernetics has gone through in the second half of this century, today its importance is more and more recognized. Its decisive influence for connectionist theories, autopoietic and constructivist theories, for different forms of applied or experimental epistemology, is being more and more understood and
generally accepted. It is mainly due to the success of connectionist models that we observe today a revival of interest for cybernetics. The 1943 article by McCulloch and Pitts is evidently a founding article. Cybernetics has however a much broader interest than the one linked to technical-mathematical details relevant to the construction of networks. For instance, the evolution from first to second order cybernetics, the ways of approaching biological and cognitive phenomena in the latter and the limits that were formulated there, are particularly meaningful to understand current developments and divergences in connectionism. A nuanced picture of cybernetic's history and its present state is therefore clearly epistemologically essential.

**Personalization and Collaboration in Adaptive E-Learning** Tadlaoui, Mouenis Anouar 2019-12-13 As part of e-learning, adaptive systems are more specialized and focus on the adaptation of learning content and presentation of this content. An adaptive system focuses on how knowledge is learned and pays attention to the activities, cognitive structures, and context of the learning material. The adaptive term refers to the automatic adaptation of the system to the learner. The needs of the learner are borne by the system itself. The learner did not ask to change the parameters of the system to his own needs; it is rather the needs of the learner that will be supposed by the system. The system adapts according to this necessity. Personalization and Collaboration in Adaptive E-Learning is an essential reference book that aims to describe the specific steps in designing a scenario for a collaborative learning activity in the particular context of personalization in adaptive systems and the key decisions that need to be made by the teacher-learner. By applying theoretical and practical aspects of personalization in adaptive systems and applications within education, this collection features coverage on a broad range of topics that include adaptive teaching, personalized learning, and instructional design. This book is ideally designed for instructional designers, curriculum developers, educational software developers, IT specialists, educational administrators, professionals, professors, researchers, and students seeking current research on comparative studies and the pedagogical issues of personalized and collaborative learning.

**Perspectives** Sajitha Bashir 2019-08-28 Cet ouvrage présente une série d'orientations politiques, ainsi que leurs déclinaisons opérationnelles, permettant aux pays d'Afrique subsaharienne de relever le défi de l'amélioration de l'apprentissage tout en élargissant l'accès et en assurant l'achèvement d'une éducation de base pour tous. L'étude souligne l'importance de configurer le système éducatif de manière à ce qu'il soit constamment axé sur les résultats et à ce que tous les enfants aient...
accès à de bonnes écoles, du matériel d’apprentissage de qualité et d’excellents enseignants. L’approche de cet ouvrage est unique car elle caractérise les pays en fonction des défis auxquels ils ont été confrontés dans les années 1990 et selon les progrès accomplis en matière d’éducation au cours des 25 dernières années, ce qui permet ainsi aux pays de la région d’apprendre les uns des autres. Les auteurs présentent une revue de littérature et y ajoutent de nouvelles analyses tirées de multiples données provenant d’une trentaine pays de la région. Ils intègrent également des résultats de recherche sur ce qui influence l’apprentissage des enfants, leur accès à la scolarisation et les progrès accomplis grâce à l’éducation de base. Le livre tire des leçons sur la région pour la région à partir de ce qui fonctionne et de ce qui serait nécessaire d’améliorer. Le livre explore quatre pistes pour aider les pays à ajuster leurs systèmes éducatifs afin d’améliorer l’apprentissage : poursuivre les efforts inachevés visant à assurer une éducation de base universelle et de qualité, assurer une supervision et un soutien efficaces des enseignants, concentrer les priorités de dépenses et les procédures budgétaires sur l’amélioration de la qualité, et combler le déficit de capacités du système institutionnel. L’ouvrage se termine par une évaluation de la manière dont les prévisions de taux de fécondité et de croissance économique peuvent impacter les progrès futurs en matière d’éducation.

On believing. De la croyance. Epistemological and semiotic approaches
Herman [Ed.] Parret 2016-01-29

Computers in Building Godfried Augenbroe 2012-12-06 Since the establishment of the CAAD Futures Foundation in 1985, CAAD experts from all over the world meet every two years to present and document the state of the art of research in Computer Aided Architectural Design. Together, the series provides a good record of the evolving state of research in this area over the last fourteen years. The Proceedings this year is the eighth in the series. The conference held at Georgia Institute of Technology in Atlanta, Georgia, includes twenty-five papers presenting new and exciting results and capabilities in areas such as computer graphics, building modeling, digital sketching and drawing systems, Web-based collaboration and information exchange. An overall reading shows that computers in architecture is still a young field, with many exciting results emerging out of both greater understanding of the human processes and information processing needed to support design and also the continuously expanding capabilities of digital technology.

Functional Approaches to Culture and Translation Dirk Delabastita 2006-10-31 This volume contains a generous selection of articles on translation by Professor José Lambert (K.U. Leuven). It traces the
intellectual itinerary of their author, who started out as a French and Comparative Literature scholar some four decades ago trying to get a better grip on the problem of inter-literary contacts, and who soon became a key figure in the emergent discipline of Translation Studies, where he is widely known as an indefatigable promoter of descriptively oriented research. This collection shows how José Lambert has never stopped asking new questions about the crucial but often hidden role of language and translation in the world of today. It includes some of the author’s classic papers as well as a few lesser known ones that deserve wider circulation. The editors’ introduction and the bibliography complete this thought-provoking survey of the career of one of the most creative researchers in the field.

Bilingualism: A Social Approach M. Heller 2007-04-29 Arguing against a common sense view of bilingualism as the co-existence of two linguistic systems, this volume develops a critical perspective which approaches bilingualism as a wide variety of sets of sociolinguistic practices connected to the construction of social difference and of social inequality under specific historical conditions.

The Handbook of Human-Machine Interaction Guy A. Boy 2017-11-01 The Handbook of Human-Machine Interaction features 20 original chapters and a conclusion focusing on human-machine interaction (HMI) from analysis, design and evaluation perspectives. It offers a comprehensive range of principles, methods, techniques and tools to provide the reader with a clear knowledge of the current academic and industry practice and debate that define the field. The text considers physical, cognitive, social and emotional aspects and is illustrated by key application domains such as aerospace, automotive, medicine and defence. Above all, this volume is designed as a research guide that will both inform readers on the basics of human-machine interaction from academic and industrial perspectives and also provide a view ahead at the means through which human-centered designers, including engineers and human factors specialists, will attempt to design and develop human-machine systems.

Performance Concept in Buildings Bruce E. Foster 1972

Scenario Studies for the Rural Environment Job F.Th. Schoute 2012-12-06 Rural areas need to fulfil a large variety of functions and to accommodate many activities. The complexity of the problems, limited funds, and the almost irreversible character of some interventions result in a compelling need to evaluate ex ante the effects of alternative solutions for designation of land, for measures to develop infrastructure, and for soil and water management. Scenario studies are undertaken to help manage the complexity, to place bounds on uncertainties, and to create new visions. After an overview of the nature, variety and scope of scenario studies, the
book illuminates various European examples and reviews, under the following headings: regional soil and water management; nature development and landscape quality; rural planning and the future of regions.

_Innovation Ecosystems_ Michel Saloff-Coste 2022-06-22 Our current situation, marked simultaneously by the Anthropocene, global warming, digitization and exponential artificial intelligence, leads us to sudden and total change in global civilization and, de facto, to rebuilding the foundations of the international economy. *Innovation Ecosystems* explores the risks and opportunities facing the contemporary world by analyzing, comparing and categorizing the world’s most dynamic innovation ecosystems by region and city. This includes the identification of key characteristics – common or original – and learning from them in terms of culture, management, system and structure, in order to meet current challenges and think about civilizations of the future.

_Dennis Cooper_ Paul Hegarty 2012 Dennis Cooper's writing has acquired a ferocious reputation for its bold experimentation, its transgressive content, and its emotional content, which is both romantic and touching, as well as cold and hard-edged. For over 20 years, Cooper has explored the boundaries of human living, with sexuality's centrality to that living. The extreme situations he develops in his writing bring out parts of the gay experience that a consensual 'community' often shies away from - likewise the heterosexual mainstream. His most important genre is undoubtedly fiction, but Cooper has also written poetry, large quantities of journalistic works - notably for *Artforum* and *Spin* - and has had great success and recognition recently with theatrical works. *Dennis Cooper: Writing at the Edge* - now available in paperback - enters deep into the worlds that Cooper fabricates, and into the coolness of his expression. This challenging work is addressed by a group of mostly young and new critical writers and academics who provide creative responses to Cooper's artistry. The contributions, which cover the breadth of Cooper's work, develop themes and devices that advance his profound and disturbing world-view. In addition to the artistic responses, the topics in the critical pieces range from sexuality in the suburbs to neurological responses via the limits and possibilities of bodies. The book also looks at the implications of contemporary electronic communication as outlined in Cooper's recent work, and his use of space. Cooper's writing receives a multi-faceted contextualization. His literary ideas are made accessible to any reader interested in learning why, today, Cooper is regarded as one of the foremost writers in expressing the psychological point behind the centrality of sexual expression.

_Cognitive Engineering in Complex Dynamic Worlds_ Erik Hollnagel 1988
Cognitive Engineering in Complex Dynamic Worlds addresses the problem of how to deploy the power available through a wide range of developments in computing technology to assist human performance. These issues are confronted in complex systems where problem solving involves changing patterns of evidence, multiple failures, and risky outcomes. The object is to provide the basis for principle driven developments of intelligent and effective decision support. This will have important repercussions for the application of computing technology in complex and safety-critical environments. Computer reliability must be enhanced so that complex systems can respond effectively in accident conditions. This volume reflects international collaboration in cognitive engineering, tackling some of the area's fundamental questions. It will be of interest to all concerned with research and advanced study at the intersection of computer science, artificial intelligence, and cognitive science. This book also presents the results that will be of great significance for those working on industrial computing applications.

Modéliser les accidents et les catastrophes industrielles : la méthode STAMP
HARDY Karim 2012-11-07 Synthèse unique en langue française,
Modéliser les accidents et les catastrophes industrielles : la méthode STAMP est le fruit d'un travail de recherche sur les modèles d'accident au sein des systèmes, qu'ils soient techniques et/ou sociaux. Cet ouvrage décrit les principales grandes théories, modèles et approches mobilisables pour comprendre, évaluer et mettre en place une démarche de prévention des accidents et de gestion des risques au sein de systèmes sociotechniques. Il présente ainsi tous les éléments nécessaires à la compréhension des modèles d'accident : définitions, objectifs, cadres théoriques et scientifiques, limites et développements, etc... L'ouvrage aborde l'accident selon une approche systémique, notamment selon la théorie générale des systèmes de Bertalanffy. Puis il propose une étude du modèle STAMP et de la technique d'analyse des dangers STPA à travers sa mise en application au sein d'un système socio-technique industriel de traitement de sédiments contaminés, en vue d'en évaluer la sécurité et d'en améliorer la performance. Clair et concis, il permet ainsi : de connaître les principaux modèles d'accident existants et de les comprendre ; d'appréhender la modélisation d'accident comme un outil essentiel de compréhension et d'analyse des interactions entre les différents éléments d'un système et donc de son comportement ; d'acquérir et d'approfondir ses connaissances sur le modèle d'accident STAMP ainsi que sur son application au sein de systèmes socio-techniques. Modéliser les accidents et les catastrophes industrielles : la méthode STAMP s'adresse à tous les professionnels de la sécurité souhaitant consolider leur connaissance des évaluations de la sécurité ou

Unesco 1983

Complexity Thinking in Translation Studies Kobus Marais 2018-10-26 This volume highlights a range of perspectives on the ways in which complexity thinking might be applied in translation studies, focusing in particular on methods to achieve this. The book introduces the topic with a brief overview of the history and conceptualization of complexity thinking. The volume then frames complexity theory through a variety of lenses, including translation and society, interpreting studies, and Bible translation, to feature case studies in which complexity thinking has successfully been or might be applied within translation studies. Using complexity thinking in translation studies as a jumping off point from which to consider the broader implications of implementing quantitative approaches in qualitative research in the humanities, this volume is key reading for graduate students and scholars in translation studies, cultural studies, semiotics, and development studies.

Handbook of Systemic Approaches to Psychotherapy Manuals Mauro Mariotti 2021 This handbook examines the development and use of manuals to guide and support systemic couples and family therapies. It addresses the process of manualizing, providing a secure base for therapist creativity rather than delineating prescriptive procedures. The volume addresses therapist and trainer concerns by demonstrating the value of sufficiently articulating clinical and teaching models to inform colleagues of what actually occurs during therapy. The book describes the history, value, and controversies of manuals. In addition, it explores issues and experiences in the creation of manuals, identifies research issues related to the use and evaluation of manuals, and addresses training as a context for the application of treatment manuals. Key areas of coverage include: Reports of experiences with major, internationally established manuals, formulations of innovative practices by their developers, and specifications of training programs. Discussion of the various formats of manuals, demonstrating their benefit and transportability across different contexts. Surveys of a broad selection of manuals, creating a flexible and diversified concept of what forms manuals may take. Essential guidance for using manuals, which is an indispensable step for the field to progress and to claim to health resource commissioning, governments and insurance agencies that the systemic practice is evidence based and effective. The Handbook of Systemic Approaches to Psychotherapy Manuals is an essential resource for researchers, professors, and graduate students as well as clinicians and related therapists and professionals in clinical psychology, family studies, public health, social...
work, psychotherapy, child and adolescent psychology and all interrelated disciplines.

**Resources in Education 1999**

*Interdisciplinary Assessment of Personal Health Monitoring* S. Schmidt

2013-07-17 Europe is facing a paradox: while governments try to curb public spending, the demands on our healthcare systems continue to rise. The use of smart technologies and innovation can help to address the challenges faced by healthcare systems today, such as an ageing population, a shortage of healthcare professionals and restrictions on financial resources. But despite increasing evidence of the benefits technology can bring, the healthcare sector has been slow to embrace the digital revolution, and has stuck to more traditional methods and models.

This book presents selected contributions to the symposium on Personal Health Monitoring (PHM) and Ethics and future areas of PHM, which took place in advance of the 11th World Congress of Bioethics, held in Rotterdam, the Netherlands, in June 2012. Most of the papers present the outcomes of the European PHM-Ethics project, which conducted interdisciplinary analyses of emerging PHM applications. Additional invited contributions deal with important issues related to the project’s primary objectives and outcomes. The project is strongly associated with the new e-Health Action Plan, launched by the European Commission in December 2012, which is designed to bring the benefits of digital solutions into healthcare systems. The book covers a broad spectrum, ranging from the technical setup of PHM systems to ethical issues raised by PHM applications, and will be of interest to all those concerned with improving the provision of healthcare worldwide.

**Traduction** Harald Kittel 2004 This international encyclopedia documents and surveys, for the first time, the entire complex of translation as well as the operations and phenomena associated with it. Structured along systematic, historical and geographic lines, it offers a comprehensive and critical account of the current state of knowledge and of international research. The Encyclopedia (1) offers an overview of the different types and branches of translation studies; (2) covers translation phenomena - including the entire range of interlingual, intralingual, and intersemiotic transfer and transformation - in their social, material, linguistic, intellectual, and cultural diversity from diachronic, synchronic, and systematic perspectives, (3) documents and elucidates the most important results of the study of translation to the present day, as well as the current debates, taking into account theoretical assumptions and methodological implications; (4) identifies, where possible, lacunae in existing research, listing priorities and desiderata for further research. The languages of publication are German, English, and French.
Resistance’ 91: Achievements and Developments in Combating Pesticide Resistance

I. Denholm 2012-12-06 The development of pesticide resistance in arthropod pests, plant pathogens and weeds can be viewed and studied from two contrasting perspectives. At a fundamental level, resistance provides an almost ideal example of adaptation to withstand severe environmental stress. Population geneticists, biochemists and, most recently, molecular biologists have cast considerable light on the nature of this adaptation in diverse taxonomic groups, and on factors determining its selection and spread within and between populations. Unlike most evolutionary phenomena, however, resistance is also of immediate practical and economic significance. Not only has the number of resistant species continued to increase inexorably, but there has been an alarming increase in the severity and extent of some resistance problems. Cases of organisms resisting virtually all available pesticides are by no means uncommon, and pose a formidable challenge in view of present difficulties in discovering and developing novel chemicals. Although most occurrences of resistance were initially monofactorial, resistance now frequently involves a suite of coexisting mechanisms that protect organisms against the same or different pesticide groups, and may even predispose them to resist new, as yet unused chemicals.

New directions in telecollaborative research and practice: selected papers from the second conference on telecollaboration in higher education

Sake Jager 2016-11-28 This collection of papers, consisting of 39 delegate contributions and three keynote articles from “New directions in telecollaborative research and practice: the second conference on telecollaboration in higher education” hosted by Trinity College Dublin in April 2016, offers a window on a rapidly evolving form of learning. Telecollaboration is used in many formats and contexts, but has as a defining feature the ability to unite learners from classrooms around the world in meaningful computer-mediated tasks and activities. This cross-disciplinary overview discusses telecollaboration in support of language and culture, teacher training, student mobility, and other disciplines and skills from a range of analytical perspectives. It will be of interest to anyone working in HE as an educator, researcher, educational designer, mobility officer, decision maker or administrator.

Informational Tracking Sylvie Leleu-Merviel 2018-04-16 “What is colour?”, “What is the precise meaning of the statement ‘the stock exchange closes at a 5% drop this evening’?”, “How are TV viewers defined?”, or “How can images produce meaning?” Such everyday questions are examined in this book. To make our analysis intuitive and understandable, numerous concrete examples illustrate our theoretical framework and concepts. The examples include gaming, fictional skits in leisure entertainment, and
enigmas. The golden thread running through the text revisits the informational process and places the datum as its pivot. The epistemological perspective of our novel approach is that of “radical relativity”. This is based on the precept that a perceptual trace carries with it the spectrum of the process that has engendered it. Given this, the informational tracking endeavour tracks the meaning-making process, notably through interpretive scaffoldings that leads to plausible realities.

**Constructing Narratives of Continuity and Change** Hazel Reid 2014-08-27

In this volume, academics and researchers across disciplines including education, psychology and health studies come together to discuss personal, political and professional narratives of struggle, resilience and hope. Contributors draw from a rich body of auto/biographical research to examine the role of narrative and how it can be constructed to compose a life story, considering the roles of significant others, inspirational, educational and fictional characters, and those in myth and legend. The book discusses how personal narrative, often neglected in social and psychological enquiry, can be a valuable resource across a range of settings. Reference is made to the evolving role of narrative in education and health care, medicine and psychotherapy. This includes how particular narratives are hardwired into culture in ways that stifle personal and social understanding. Rather than providing a ‘how to’ guide, the book illustrates the range and power of narrative, including poetry, to re-awaken senses of self and agency in extremis. Each chapter draws on specific research, describing the context, explaining the methodology, and illuminating important findings. Discussing implications for research and practice, this book will be key reading for postgraduate and doctoral students in auto/biographical and narrative studies, and across a range of disciplines, including education, health and social care, politics, counselling and psychotherapy. It will be of interest to academics teaching research methods, and those developing biographical and auto/biographical narrative research.

**Un cadre d'investissement pour la nutrition** Meera Shekar 2017-07-26

L'ouvrage **Un cadre d'investissement pour la nutrition: atteindre les cibles mondiales en matiere de retard de croissance, d'anemie, d'allaitement maternel et d'emaciation estime les couts et les impacts des differents scenarios de financement qui permettraient l'atteinte des cibles mondiales de nutrition adoptees par l' Assemblee mondiale de la sante en matiere de retard de croissance, danemie chez la femme, d'allaitement matemel exclusif et de mise a l'echelle du traitement de l'emaciation severe chez le jeune enfant. 11 faudra, pour atteindre ces quatre cibles, proceder a des financements mondiaux de 70 milliards de dollars sur lOans, ceci dans des interventions specifiques a la nutrition a fort impact. Ces
investissements auraient toutefois des retombees substantielles : 65 millions de cas de retard de croissance et 265 millions de cas d'anémie chez la femme auraient été évités en 2025 comparativement à l'année de référence 2015. En outre, sur 10 ans, au moins 91 millions d'enfants supplémentaires auraient été traités pour emaciation sévère et 105 millions de nourrissons additionnels auraient été bénéficiaires d'un allaitement maternel exclusif au cours de leurs premiers six mois de vie. L'atteinte de l'ensemble de ces cibles permettrait d'éviter au moins 3,7 millions de mortalités infantiles. Chaque dollar investi dans ce paquet d'interventions générerait des rendements économiques de 4 à 35 dollars, ce qui fait du financement de la nutrition précoce l'une des interventions de développement les plus rentables. Certaines des cibles - particulièrement celles qui sont axées sur la réduction du retard de croissance chez l'enfant et de l'anémie chez la femme paraissent ambitieuses et demanderont des efforts concertés de financement, de mise à l'échelle et d'engagement continu; toutefois, l'expérience tirée de plusieurs pays indique que leur atteinte reste possible. Les investissements au cours des 1000 premiers jours décisifs de la petite enfance sont inaliénables, transportables et porteurs de retombees tout au long de la vie - non seulement pour les enfants directement concernés, mais aussi pour nous tous - sous forme de sociétés plus robustes, qui agissent comme moteur des économies à venir.

Performance Concept in Buildings: Invited papers Bruce E. Foster 1972
Sourcebook of Family Theories and Methods Pauline Boss 2008-11-19
Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots (i.e., sources) from which these orientations and strategies flow. Thus, an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself. A goal was thus set to write a book that, like Janus, would face both backward and forward a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project: The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964; the two Contemporary Theories about the Family volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979; and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz, then in production.

Mapping World Communication Armand Mattelart 1994 The task of this book is to reconstruct the genealogy of the sphere of world communication. We will follow a multidimensional approach, analyzing the ways in which technologies and networks have taken root since the
nineteenth century and have ceaselessly pushed back to light the concepts, doctrines, theories, and controversies that have marked the construction of the scientific field known as international communications. 

*PASCAL* explore 1989

*Radio Content in the Digital Age* Angeliki Gazi 2011-01-01 The traditional radio medium has seen significant changes in recent years with the current global shift toward multimedia content, with both digital and FM making significant use of new technologies, including mobile communications and the Internet. This book focuses on the important role these new technologies play—and will play as radio continues to evolve. Originally from talks given at the 2009 Radio Content in the Digital Age conference in Cyprus, this series of essays by top academics in the field examines new options for radio technology as well as a summary of the opportunities and challenges that characterize academic and professional debates around radio today.

*The Emerald Handbook of Multi-Stakeholder Communication* Pantea Foroudi 2022-10-21 The Emerald Handbook of Multi-Stakeholder Communication gathers an international, multidisciplinary team of experts to explore effective brand messaging for multiple stakeholders, utilizing a diverse array of theoretical and methodological approaches that cumulatively present an up-to-date overview of the whole field.

*Pluralism in Economics* Andrea Salanti 1997-01-01 Pluralism in Economics sheds new light on the various meanings & consequences of pluralist approaches to the history & methodology of economics. It focuses on philosophical & methodological issues, & contains case studies.

*Learner Support in Online Learning Environments* Chrysta Pelissier 2019-04-26 We are at a crucial time for the production and dissemination of knowledge – one in which the scientific community is questioning the nature of the digital humanities. Within this context, Learner Support in Online Learning Environments proposes, by taking into consideration the notion of assistance in a learning context, an original method of positioning digital resources for teachers, students and researchers in the humanities and social sciences. Questioning existing theoretical frameworks and prototypes, learner support in digital environments is presented as both a process and a result integrating a variety of resources. Some of these resources already exist, some may be adapted from existing objects and still others have yet to be imagined. The end goal is to facilitate both independent and group-based learning activities.

*L’approche systémique en santé mentale* Louise Blanchette 1999
