Gender and Our Brains Gina Rippon 2020-07-07 A breakthrough work in neuroscience—and an incisive corrective to a long history of damaging pseudoscience—that finally debunks the myth that there is a hardwired distinction between male and female brains. We live in a gendered world, where we are ceaselessly bombarded by messages about sex and gender. On a daily basis, we face deeply ingrained beliefs that sex determines our skills and preferences, from toys and colors to career choice and salaries. But what does this constant gendering mean for our thoughts, decisions and behavior? And what does it mean for our brains? Drawing on her work as a professor of cognitive neuroimaging, Gina Rippon unpacks the stereotypes that surround us from our earliest moments and shows how these messages mold our ideas of ourselves and even shape our brains. By exploring new, cutting-edge neuroscience, Rippon urges us to move beyond a binary view of the brain and to see instead this complex organ as highly individualized, profoundly adaptable and full of unbounded potential. Rigorous, timely and liberating, Gender and Our Brains has huge implications for women and men, for parents and children, and for how we identify ourselves.

Testosterone Rex: Myths of Sex, Science, and Society

Cordelia Fine 2017-01-24 “Beliefs about men and women are as old as humanity itself, but Fine’s funny, spiky book gives reason to hope that we’ve heard the last of that.” —Annie Murphy Paul, New York Times Book Review Many people believe that, at its core, biological sex is a fundamental force in human development. According to this false-yet-familiar story, the divisions between men and women are in nature alone and not part of culture. The Female Brain

Louann Brizendine, M.D. 2007-08-07 Since Dr. Brizendine wrote The Female Brain ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can’t remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have sparked both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women’s brain function. In The Female Brain, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

Lost in the Valley of Death Harley Rustad 2022-01-11 "By patient accumulation of anecdote and detail, Rustad evokes Shetler’s story into something much more human, and humanity tragic, into a layered inquisition and a reportorial force....suffice it to say Rustad has done what the best storytellers do: tried to track the story to its last twig and then stepped aside." —New York Times Book Review In the vein of Jon Krakauer's Into the Wild, a riveting work of narrative nonfiction centering on the unsolved disappearance of an American backpacker in India—one of at least two dozen tourists who have met a similar fate in the remote and storied Parvati Valley. For centuries, India has enthralled westerners looking for an exotic getaway, a brief immersion in yoga and meditation, or in rare cases, a true pilgrimage to find spiritual revelation. Justin Alexander Shetler, an inveterate traveler trained in wilderness survival, was one such seeker. In his early thirties Justin Alexander Shetler, quit his job at a tech startup and set out on a global journey of discovery guided by his motorcycle. He traveled through the Americas—by motorcycle—and the Himalayas, Thailand, and Nepal, in search of authentic experiences and meaningful encounters, while also documenting his travels on Instagram. His enigmatic character and magnetic personality gained him a devoted following who lived vicariously through his adventures. But the ever restless explorer was driven to pursue ever greater challenges, and greater risks, in what had become a personal quest—his own hero’s journey. In 2016, he made his way to the Parvati Valley, a remote and rugged corner of the Indian Himalayas steeped in mystical tradition yet shrouded in darkness and danger. There, he spent weeks studying under the guidance of a sadhu, an Indian holy man, living and meditating in a cave. At the end of August, accompanied by the sadhu, he set off on a “spiritual journey” to a holy lake—a journey from which he would never return. Lost in the Valley of Death is about one man’s search to find himself, in a country where for many westerners the path to spiritual enlightenment can prove fraught, even treacherous. But it is also a story of love, and sometimes extreme, we seek fulfillment in life. Lost in the Valley of Death includes 16 pages of color photographs.

The story begins in the summer of 2011. Nour has just lost her father to cancer, and her mother moves Nour and her sisters from New York City back to Syria to be closer to their family. In order to keep her father’s spirit alive as she adjusts to her new home, Nour tells herself their favorite story—the tale of Rawiya, a twelve-century girl who disguised herself as a boy in order to apprentice herself to a famous mapmaker.

But the Syria Nour’s parents knew is changing, and it isn’t long before the war reaches their quiet Homs neighborhood. When a shell destroys Nour’s house and almost takes her life, she and her family are forced to choose: stay and risk more violence or flee across seven countries of the Middle East and North Africa in search of safety—along the very route Rawiya and her mapmaker took eight hundred years before in their quest to chart the world. As Nour’s family decides to take the risk, their journey becomes more and more dangerous, until they face a choice that could mean the family will be separated forever. Following alternating timelines and a pair of unforgettable heroines coming of age in perilous times, The Map of Salt and Stars is the “magical and heart-wrenching” (Christian Science Monitor) story of one girl telling herself the legend of another and learning that, if you listen to your own voice, some things can never be lost.

Men Are from Mars, Women Are from Venus John Gray 1993-04-23 Popular marriage counselor and seminar leader John Gray provides a unique, practical and proven way for men and women to communicate and relate better by acknowledging the differences between them. Once upon a time Martians and Venuses met, fell in love, and had happy relationships together because they respected and accepted their differences. Then they came to earth and amnesia set in: they forgot they were from different planets. Using this metaphor to illustrate the commonly occurring conflicts between men and women, Gray explains how these differences can come between the sexes and prohibit mutually fulfilling loving relationships.

Based on years of successful counseling of couples, he gives advice on how to counteract these differences in communication styles, emotional needs and modes of behavior to promote a greater understanding between individual partners. Gray shows how men and women react differently in conversation and how their relationships are affected by male intimacy cycles (“get close”, “back off”), and female self-esteem fluctuations (“I’m okay”, “I’m not okay”). He encourages readers to accept the other gender’s particular way of expressing love, and helps men and women learn how to fulfill each other’s emotional needs. With practical suggestions on how to reduce conflict, crucial information on how to interpret a partner’s behavior and methods for preventing emotional “trash from the past” from invading new relationships, Men Are from Mars, Women Are from Venus is a valuable tool for couples who want to develop deeper and more satisfying relationships with their partners.

But how do you read a climate map? And how are these maps made? Read on to learn the details!

Nonstop Metropolis Rebecca Solnit 2016-10-19 This set explores the hidden histories of San Francisco, New Orleans, and New York City. With many contributors, each atlas addresses the multi-faceted nature of a city as experienced by numerous categories of inhabitants.

The Kite Runner was to Afghanistan; the story of two girls living eight hundred years apart—a modern-day Syrian refugee seeking safety and an adventurous mapmaker’s apprentice—“perfectly aligns with the cultural moment” (The Providence Journal) and “shows how interconnected two supposedly opposing worlds can be” (The New York Times Book Review). This “beguiling” (Seattle Times) and stunning novel begins in the summer of 2011. Nour has just lost her father to cancer, and her mother moves Nour and her sisters from New York City back to Syria to be closer to their family. In order to keep her father’s spirit alive as she adjusts to her new home, Nour tells herself their favorite story—the tale of Rawiya, a twelfth-century girl who disguised herself as a boy in order to apprentice herself to a famous mapmaker.

But the Syria Nour’s parents knew is changing, and it isn’t long before the war reaches their quiet Homs neighborhood. When a shell destroys Nour’s house and almost takes her life, she and her family are forced to choose: stay and risk more violence or flee across seven countries of the Middle East and North Africa in search of safety—along the very route Rawiya and her mapmaker took eight hundred years before in their quest to chart the world. As Nour’s family decides to take the risk, their journey becomes more and more dangerous, until they face a choice that could mean the family will be separated forever. Following alternating timelines and a pair of unforgettable heroines coming of age in perilous times, The Map of Salt and Stars is the “magical and heart-wrenching” (Christian Science Monitor) story of one girl telling herself the legend of another and learning that, if you listen to your own voice, some things can never be lost.
