Gendered Fields Rural Women Agriculture And Environment

This is one of the few cases by which the soft documents of this Gendered Fields Rural Women Agriculture And Environment by online. You might not require more time to spend to go to the books foundation as with ease as search for them. In some cases, you likewise accomplish not uncover the statement Gendered Fields Rural Women Agriculture And Environment that you are looking for. It will no question quander the time.

However, below with you visit this web page, it will be consequently entirely simple to get as skillfully as download guide Gendered Fields Rural Women Agriculture And Environment. It will not assume many many as we explain before. You can complete it though doing something else at home and even in your workplace. for that reason easy! So, are you question? Just exercise just what we allow under as capably as review Gendered Fields Rural Women Agriculture And Environment what you behind to read!
gender, rurality, identity, and class studies.

Women Farming in Appalachia: Women and Mining in Central Appalachia

Tony Allan 2019-09-27 Food, water and society: what is managed by whom, and with what effects? Our book, Water Revolution - the Politics of Water Rights - published by Earthscan, offers a range of new insights into water management and its impacts. The book's main themes include the politics of water rights, the role of local communities in managing water resources, and the need for a more participatory approach to water governance. The book will appeal to students and practitioners in Geography, Development Studies, Gender Studies and related disciplines.

Gendered Fields: Rural Women, Agriculture and Environment

Vicki A. Swinbank 2021-04-16 Women have always been inextricably linked to food, especially in its production and preparation. This link, which applies cross-culturally, has seldom been fully acknowledged or celebrated. The role of women in this is usually taken for granted and often regarded as unimportant or invisible. This book presents a wide-ranging, interdisciplinary and comprehensive analysis of women's contributions and cultures. This central role is examined through a range of lenses, namely agricultural, intergenerational, and socially diverse.

Gender Regimes, Citizen Participation and Rural Restructuring

Idaho Austra Morell 2008 This book aims to unravel how rural women manage their own smallholder livelihoods, and the impact of these strategies on household welfare. It offers a fresh perspective on gendered, rural, and communal food systems in the context of contemporary policy concerns. It provides a comprehensive overview of the social, economic, and political dimensions of rural livelihoods in the Third World. The book is a valuable resource for students and researchers in the fields of rural gender relations, gender, agriculture, and development.

Gender and Food

Mary Zeiss Stange 2013-01-09 This book aims to unravel how rural women manage their own smallholder livelihoods, and the impact of these strategies on household welfare. It offers a fresh perspective on gendered, rural, and communal food systems in the context of contemporary policy concerns. It provides a comprehensive overview of the social, economic, and political dimensions of rural livelihoods in the Third World. The book is a valuable resource for students and researchers in the fields of rural gender relations, gender, agriculture, and development.

Gender and Food

Ildiko Asztalos Morell 2008 This book aims to unravel how rural women manage their own smallholder livelihoods, and the impact of these strategies on household welfare. It offers a fresh perspective on gendered, rural, and communal food systems in the context of contemporary policy concerns. It provides a comprehensive overview of the social, economic, and political dimensions of rural livelihoods in the Third World. The book is a valuable resource for students and researchers in the fields of rural gender relations, gender, agriculture, and development.

Gender and Food

Ethical Trade, Gender and Sustainable Livelihoods

Kath Smith 2014-03-21 Fair and ethical trade is often criticized for being highly gendered, and for institutionalizing the ethical values of consumers, the priorities of NGOs and governments, and most of all, food retailers. The book emphasizes that, much more than the act of predicting impacts in a regulatory context, SIA needs to be the process of managing the environment, environment and society, and that greater attention needs to be given to ensuring that the goals of development are attained and enhanced. This significant addition to the literature will be an invaluable reference for academics, consultants and practitioners, and students.

Women Working In The Environment Carolyn E. Sachs 2014-02-25 Based on the latest insights from econometrics, women's work of production and development, and postmodernism, and the convincing empirical work of numerous scholars, this book is organized around five axes of gender relations, and the environment: Part 1: gender divisions of labor, Part 2: property rights, Part 3: knowledge and strategies for sustainability, Part 4: environmental and social movements, and Part 5: policy alternatives. Examining women's relationship with the environment using these five dimensions provides concrete, material examples of how women work with, control, know, and affect the environment. The book is interdisciplinary and international in scope, with contributions from sociologists, economists, anthropologists and ecologists who study women and gender.

The Routledge Handbook of Gender and Development

Anne Coles 2015-02-20 The Routledge Handbook of Gender and Development is a cross-disciplinary collection of essays which provides a comprehensive overview of the rich and diverse literatures on gender, development, and sustainable livelihoods. It is the most comprehensive text available on the topic, and will appeal to students and practitioners in Geography, Development Studies, Gender Studies and related disciplines.

It provides a comprehensive overview of the social, economic, and political dimensions of rural livelihoods in the Third World. The book is a valuable resource for students and researchers in the fields of rural gender relations, gender, agriculture, and development.
Can market-based approaches to technology development and dissemination benefit women smallholder farmers? Njuki, Jemimah 2014-07-11 Rural household economies dependent on rainfed agriculture are increasingly turning to irrigation technology solutions to reduce the effects of weather variability and guard against inconsistent and low crop output. Organizations are increasingly using market-based approaches to disseminate technologies to smallholder farmers, and, although women are among their targeted group, little is known of the extent to which these approaches are reaching and benefiting women. There is also little evidence on the implications of women’s use and control of irrigation technologies for outcomes, including crop choice and income management. This paper reports findings from a qualitative study undertaken in Tanzania and Kenya to examine women’s access to and ownership of KickStart pumps and the implications for their ability to make major decisions on crop choices and income use. Results from sales-monitoring data show that women purchase less than 10 percent of the pumps and men continue to make most of the major decisions on crop choices and income use. These findings vary by type of crop, with men making major decisions on high-income crops such as tomatoes and women having relatively more autonomy on crops such as leafy vegetables. The study concludes that market-based approaches on their own cannot guarantee access to and ownership of technologies, and businesses need to take specific measures toward the goal of reaching and benefiting women.

Opening Windows onto Hidden Lives Julie N. Zimmerman 2015-11-06 Building on their analysis in Sociology in Government (Penn State, 2003), Julie Zimmerman and Olaf Larson again join forces across the generations to explore the unexpected inclusion of rural and farm women in the research conducted by the USDA’s Division of Farm Population and Rural Life. Existing from 1919 to 1953, the Division was the first, and for a time the only, unit of the federal government devoted to sociological research. The authors explore how these early rural sociologists found the conceptual space to include women in their analyses of farm living, rural community social organization, and the agricultural labor force.

Advancing gender equality through agricultural and environmental research: Past, present, and future Pyburn, Rhiannon, ed. 2021-11-02 Over the past decade, interest in gender equality and women’s empowerment has grown rapidly, creating a unique opportunity to institutionalize gender research within agricultural research for development. This book, edited by researchers from the CGIAR Gender Platform, reviews and reflects on the growing body of evidence from gender research. It marks a shift away from a traditional focus on how gender analysis can contribute to improved productivity, flipping the question to ask, How does agricultural and environmental research and development contribute to gender equality and women’s empowerment? Chapters synthesize the wide range of CGIAR and other research in this area, covering breeding research and seed systems, value chain participation, nutrition-sensitive agriculture, natural resources, climate adaptation and mitigation, the “feminization” of agriculture, women’s role in agricultural research, and emerging gender transformative approaches.
