Advanced Dairy Chemistry, Volume 2 Paul L. H. McSweeney 2020-12-08 The Advanced Dairy Chemistry series was first published in four volumes in the 1980s (under the title Developments in Dairy Chemistry) and revised in three volumes in the 1990s and 2000s. The series is the leading reference on dairy chemistry, providing in-depth coverage of milk proteins, lipids, lactose, water and minor constituents. Advanced Dairy Chemistry Volume 2: Lipids, Fourth Edition, is unique in the literature on milk lipids, a broad field that encompasses a diverse range of topics, including synthesis of fatty acids and acylglycerols, compounds associated with the milk fat fraction, analytical aspects, behavior of lipids during processing and their effect on product characteristics, product defects arising from lipolysis and oxidation of lipids, as well as nutritional significance of milk lipids. In the years since the publication of the third edition there have been significant developments in milk lipids and these are reflected in changes to this volume. Most topics included in the third edition are retained in the current edition, which has been updated; in some cases, new authors have given their perspective on certain topics. Chapters on nutritional significance of dairy lipids have been considerably revised. This authoritative work summarizes current knowledge on milk lipids and suggests areas for further work. It will be very valuable to dairy scientists, chemists and others working in dairy research or in the dairy industry.

New Zealand Landscape Paul Williams 2017-05-18 New Zealand Landscape: Behind the Scene tells the story of New Zealand through the subject of geomorphology, a branch of earth science at the interface of geology and geography. Geomorphology is informally described as the ‘science of scenery’, and as with every science, ideas evolve as the research frontier advances. Users will find an early 21st century interpretation of the New Zealand landscape, an interpretation that rests on, and draws from, a rich foundation of ideas bequeathed by predecessors who have had the privilege of exploring, researching, and enjoying this corner of the Pacific. Tells a geological and geographical story with questions that are addressed and answered in the course of the book. Written in an accessible style for both researchers and students Features full-color photos of the beautiful New Zealand landscape

Handbook of Fiber Science and Technology Volume 2 Menachem Lewin 2018-05-02 Continuing the outstanding coverage from Part A, the authoritative information in Functional Finishes, Part B makes your work with fibers and fabrics cost-effective ...offers practical guidance in finishing techniques-including flame retardancy, water and oil repellency, soil release, electroconductivity, and radiation ... and eases your continuing study of this expanding field with numerous, current references-with many original findings not previously cited. As new advances widen the scope of this field, each volume of Handbook of Fiber Science and Technology becomes an indispensable acquisition for researchers. Textile, fiber, polymer, organic, physical, and biological chemists; textile finishers and chemical manufacturers; R & D personnel in the polymer, fiber, chemical, and textile industries; plastics and chemical engineers; materials scientists; and wood and paper technologists will find them essential references. They are also superior sources of supplementary reading for graduate and advanced undergraduate courses in polymer, fiber, and textile chemistry and technology; chemical processing of fibers, chemical technology, and polymer processing.
A Portrait of New Zealand Warren Jacobs 2012-03 The country's longest-standing scenic book, A Portrait of New Zealand depicts the landscapes of the North and South Islands in over 200 glorious photographs. The book was first published in 1982 in two separate volumes, with the combined edition published in 1988 and reprinted every year since. Today, with over 200,000 sales to its credit, A Portrait of New Zealand is a Platinum title on the Premier New Zealand Bestsellers list - a statistic that testifies to the book's immense appeal and its high value for money. The current edition contains the same well-loved images but has been given new colour reproduction throughout in order to restore the spectacular quality of the original photographs. Errol Brathwaite's original text has been revised and rewritten by the multi-award-winning journalist and writer Jill Worrall, who was voted Cathay Pacific Travel Writer of the Year in 2005. Illustrated History charts the sweep of Māori history from ancient origins through to the twenty-first century. Through narrative and images, it offers a striking overview of the past, grounded in specific localities and histories. The story begins with the migration of ancestral peoples out of South China, some 5,000 years ago. Moving through the Pacific, these early voyagers arrived in Aotearoa early in the second millennium AD, establishing themselves as tangata whenua in the place that would become New Zealand. By the nineteenth century, another wave of settlers brought new technology, ideas and trading opportunities – and a struggle for control of the land. Survival and resilience shape the history as it extends into the twentieth century, through two world wars, the growth of an urban culture, rising protest, and Treaty settlements. Today, at the beginning of the twenty-first century, Māori are drawing on both international connections and their ancestral place in Aotearoa. Fifteen stunning chapters bring together scholarship in history, archaeology, traditional narratives and oral sources. A parallel commentary is offered through more than 500 images, ranging from the elegant shapes of ancient taonga and artefacts to the anthropomorphised figures in the sketchbooks and paintings of early European observers, through the shifting focus of the photographer’s lens to the response of contemporary Māori artists to all that has gone before. The many threads of history are entwined in this compelling narrative of the people and the land, the story of a rich past that illuminates the present and will inform the future.

Medicinal Plants in Australia Volume 2 Cherylly Williams 2011-02-01 This is a book designed to enhance our appreciation of the medicinal history of Australia’s flora, its unique contributions to everyday life, and its extraordinary future potential. The renewed importance of the medical amputation of limbs for the loss of limbs. Medicinal Plants is discussed particularly in relation to the advent of drug-resistant strains of bacteria, fungi, and viruses. New Eucalypts that can yield higher grade oils, essential oils from the Melaleuca and Leptospermum show excellent therapeutic potential, and the success of Tea oil in the international market is also discussed. Commercial value of resins, gums and tannins is covered.

Australian Beetles Volume 2 Adam Slipinski 2019-11-01 This three-volume series represents a comprehensive treatment of the beetles of Australia, a relatively under-studied fauna that includes many unusual and unique lineages found nowhere else on Earth. Volume 2 contains 36 chapters, providing critical information and identification keys to the genera of the Australian beetle families included in suborders Archostemata, Myxophaga, Adephaga and several groups of Polyphaga (Scolioidea, Hydrophiloidae, Scarabaeoidea, Buprestoidea and Tenebrionoidea). Each chapter is richly illustrated in black and white drawings and photographs. The book also includes colour habitus figures for about 1000 Australian beetle genera and subgenera belonging to the families treated in this volume. This volume is a truly international collaborative effort, as the chapters have been written by 23 contributors from Australia, China, Czech Republic, Germany, Italy, Poland and USA.

Irish History of Civilization, Volume 2 Donald Harman Akinson 2005-02-11 In a sprawling chronicle of civilization through Irish eyes, Akinson takes us from St Patrick to Woodie Guthrie, from Constantine to John F. Kennedy, from India to the Australian outback. In two volumes of masterful storytelling he creates ironic, playful, and acerbic historical miniatures - a quixotic series of reconstructions woven into a helix in which the same historical figures reappear in radically different contexts as their narratives intersect with the larger picture.

Health Care Needs Assessment, First Series, Volume 2, Second Edition Andrew Stevens 2018-12-14 Health care needs assessment provides information to plan, negotiate and change services for the better, and to improve health in other ways. The first edition of this series established itself as a key source on health care needs for specific conditions supported by the Department of Health. Now in its second edition it provides vital updates taking into account how health care has moved on and how the structure of the UK’s health service has changed. Each of the chapters follows the same structure; each analysing its topic, reviewing the incidence and prevalence, the range of services available, and the effectiveness of those services. It describes the central role and aim of health care needs assessment in the NHS health care reforms and explains the ‘epidemiological approach’ to needs assessment and its effectiveness. Volume 1 includes diabetes mellitus, renal disease, stroke, lower respiratory disease, coronary heart disease, colorectal cancer, cancer of the lung, osteoarthritis affecting the hip and knee, cataract surgery and impotence in men. Volume II includes benign prostatic hyperplasia, severe mental illness, Alzheimer’s disease, alcohol misuse, drug misuse, learning disabilities, community child health services and contraception, induced abortion and fertility services. All health professionals, including policy makers and shapers and those assessing quality of service will find this book an essential resource.

Australian Bryozoa Volume 2 Haylee Weaver 2018-07-01 Bryozoans are aquatic animals that form colonies of connected individuals. They take a variety of forms: some are bushy and moss-like, some are flat and encrusting and others resemble lace. Bryozoans are mostly marine, with species found in all oceans from sublittoral to abyssal depths, but freshwater species also exist. Some bryozoans are of concern as marine-fouling organisms and invasive species, while others show promise as sources of anticancer, antiviral and antifouling substances. Written by experts in the field, Australian Bryozoa Volume 2: Taxonomy of Australian Families is the second of two volumes describing Australia’s 12,000 known species of bryozoans, the richest diversity of bryozoans of any country in the world. It contains detailed taxonomic data and illustrated family-level treatments, which can be used to identify specimens. It provides an authoritative reference for biology students, academics and others interested in marine biology.

National Geographic Traveler - New Zealand Peter Turner 2018-02-06 Travel to New Zealand to taste the islands’ unique cuisine, discover Maori culture, and drive through “Middle Earth” landscapes—with National Geographic experts as your trusted guides. This newly revised edition of National Geographic’s comprehensive New Zealand guide brings the visitor attractions, museums, hotels, restaurants, and ski resorts of this dynamic country right up to the moment. The Christchurch chapter has been fully updated to reflect the recovery and rebuilding after the earthquakes of 2010 and 2011, and a new two-page experiential feature on traveling the Great Rides cyclist trails of New Zealand has been added. Travel information tips for Auckland, Wellington, Christchurch and Canterbury, and excursions around all the islands have all been updated, featuring new activities. Walks in Auckland and Dunedin, as well as a Tongariro Alpine crossing, are also provided, along with suggested drives around the East Cape and through the Catlins; all include maps and reservation details. Informational features take the traveler “In Pursuit of the Rings,” into the realm of a wildlife wonderland, and high up into New Zealand’s ski country and glaciers. And, of course, the latest on the conquering All Blacks—2015 Rugby World Cup winners—not long ago chronicled.

Growing Up Communist and Jewish in Bondi Volume 2 John Docker 2020-10-15 Elsie Levy was born in the Jewish East End of London, came to Sydney with her family when she was 14, and joined the Communist Party of Australia when she was a young woman. In this book, her son explores her diasporic Jewish identity, both English and Australian, and in the process journeys into Jewish cultural histories. We meet important cultural figures such as Leonard Woolf, Freud, Schnitzler, Veza Canetti and Ida Rubinstein. This journey leads also to English anti-Semitism, including, shockingly, Bloomsbury. In turning to Communism and marrying out, Elsie Levy became one of history's undutiful daughters.

The Penguin History of New Zealand Michael King 2011 New Zealand was the last country in the world to be discovered and settled by humankind. It was also the first to introduce full democracy. Between those events, and in the century that followed the franchise, the movements and the conflicts of human history have been played out more intensively and more rapidly in New Zealand than anywhere else on Earth. The Penguin History of New Zealand, a new book for a new century, tells that story in all its colour and drama. The narrative that emerges in an inclusive one about men and women, Maori and Pakeha. It shows that British motives in colonising New Zealand were essentially humane; and that Maori, far from being passive victims of a 'fatal impact', coped heroically with colonisation and survived by selectively accepting and adapting what Western technology and culture had to offer. This book, a triumphant fruit of careful research, wide reading and judicious assessment, was an unprecedented best-seller from the time of its first publication in 2003.
