represented, but actively participated in debates about theology, politics, race, gender, and sexuality at a time when Latter-day Saints were grappling with evolving doctrine, conflict with Native Americans, and political turmoil resulting from their practice of polygamy. The book makes an important contribution to art history, Mormon studies, American studies, and religious studies.

The Archaeology of Nucleation in the Old World  Attila Gyucha 2022-05-31 Fourteen papers take advantage of advances in archaeological methods and theory to explore the role of the built environment in expressing and shaping community organization and identity at prehistoric and historic nucleated settlements and early cities in the Old World.

Manifest Destinations  J. Philip Gruen 2014-09-02 In Manifest Destinations, J. Philip Gruen examines the ways in which tourists experienced Chicago, Denver, Salt Lake City, and San Francisco between 1869 and 1893, a period of rapid urbanization and accelerated modernity. Gruen pays particular attention to the contrast between the way these cities were promoted and the way visitors actually experienced them.

Nineteenth-Century Mormon Architecture and City Planning  C. Mark Hamilton 1995-08-24 This book is the first comprehensive study of Mormon architecture. It centers on the doctrine of Zion which led to over 500 planned settlements in Missouri, Illinois, Utah, Idaho, Wyoming, Colorado, New Mexico, Arizona, California, Nevada, Canada, and Mexico. This doctrine also led to a hierarchy of building types from temples and tabernacles to meetinghouses and tithing offices. Their built environment stands as a monument to a unique utopian society that not only survived but continues to flourish where others have become historical or cultural curiosities. Hamilton's account, augmented by 135 original and historical photographs, provides a fascinating example of how religious teachings and practices are expressed in planned communities and architecture types.

Mormons in America  Claudia Lauper Bushman 2001-12-27 Mormonism is one of the world's fastest growing religions, doubling its membership every 15 years. The Church of Jesus Christ of Latter-day Saints (the formal denomination of the Mormon church) is now 10 million strong, with more than half of its membership coming from outside the United States. More than 88 million copies of The Book of Mormon have been printed, and it has been translated into more than 50 languages. Mormons in America tells the tumultuous story of this religious group, from its humble origins in small-town New York State in 1830 to its present heyday. Claudia and Richard Bushman introduce us to charismatic leaders like Joseph Smith and Brigham Young, go deep behind Mormon rites and traditions, take us along the adventurous trail of the Mormon pioneers into the West, evoke the momentous erection of Salt Lake City in the desert, and draw us into the dozens of skirmishes, verbal attacks, and court battles between Mormons and their neighbors, other religions, the media, and the American government. Religion in American Life explores the evolution, character, and dynamic of organized religion in America from 1500 to the present day. Written by distinguished historians of religion, these books weave together the varying stories that compose the religious fabric of the United States, from Puritanism to alternative religious practices. Primary source material coupled with handsome illustrations and lucid text make these books essential in any exploration of America's diverse nature. Each book includes a chronology, suggestions for further reading, and an index.

Grid Planning in the Urban Design Practices of Senegal  Liora Bigon 2020-01-01 This book is the first to trace the genealogy of an indigenous grid-pattern settlement design practice in Africa, and more specifically in Senegal. It does so by analyzing how the precolonial grid-plan design tradition of this country has become entangled with French colonial urban grid-planning, and with present-day, hybrid, planning cultures. By thus, it transcends the classic precolonial-colonial-postcolonial metahistorical divides. This properly illustrated book consists of five chapters, including an introductory chapter (historiography, theory and context) and a concluding chapter. The chapters' text has both a chronological and thematic rationale, aimed at enhancing Islamic Studies by situating sub-Saharan Africa's urbanism within mainstream research on the Muslim World; and at contributing directly to the wider project of de-Eurocentrizing urban planning history by developing a more inclusive, truly global, urban history.
